

My Summer

"Ring, ring, ring!" I jumped for joy at the sound of the school bell on the last day of school. I couldn't wait for school to be out because I knew I was going to have an amazing summer!

First of all, I went to Arizona to visit my Aunt Cindy. For two weeks, I had fun with my favorite aunt. When she saw me, she said, "How's my favorite niece?" I replied, "I'm your only niece!" We had a great time shopping, swimming, and baking cookies. It's always great to visit my Aunt Cindy.

After I got back home, I stayed up late many nights and watched a lot of movies. I like scary movies, but my mom always says, "Scary movies keep you up at night!" She won't let me watch them during the school year. However, she lets me watch some scary movies in the summer since I don't have to get up for school. Staying up late is awesome!

Finally, I did my favorite activity of all. I worked on my crafty scrapbooking projects. There were boxes of pictures just waiting for me to turn them into cute scrapbook pages. I missed my friends from school, so I enjoyed creating colorful pages to help me remember all the fun we had. I made some fantastic scrapbook pages!

I like school, but I love summer! It's really the best time of the year. I wish it would never end!

Collateral Damage Sharon L. Nichols, David C. Berliner, 2007-03-01 Drawing on their extensive research Nichols and Berliner document and categorize the ways that high stakes testing threatens the purposes and ideals of the American education system For more than a decade the debate over high stakes testing has dominated the field of education This passionate and provocative book provides a fresh perspective on the issue and powerful ammunition for opponents of high stakes tests Their analysis is grounded in the application of Campbell s Law which posits that the greater the social consequences associated with a quantitative indicator such as test scores the more likely it is that the indicator itself will become corrupted and the more likely it is that the use of the indicator will corrupt the social processes it was intended to monitor Nichols and Berliner illustrate both aspects of this corruption showing how the pressures of high stakes testing erode the validity of test scores and distort the integrity of the education system Their analysis provides a coherent and comprehensive intellectual framework for the wide ranging arguments against high stakes testing while putting a compelling human face on the data marshalled in support of those arguments
