This section is a necessary ingredient to student understanding of fractions in all their related forms (i.e., proper fractions, improper fractions, and mixed numbers) since it connects all fractional elements together for students and dramatically increases their global understanding. Decimal numbers can be added to a fractional number line and complete a student's number-sense understanding of all fraction/decimal elements and interactions. However, decimals are not included in the process depicted on the fractional number line (below) since this unit is exclusively dedicated to equivalent fractions.
