The Emergence of Pressure Blade Making Pierre M. Desrosiers, 2012-03-13
Human development is a long and steady process that began with stone tool making. Because of this skill humans were able to adapt to climate changes, discover new territories and invent new technologies. Pressure knapping is the common term for one method of creating stone tools where a larger device or blade specifically made for this purpose is used to press out the stone tool. Pressure knapping was invented in different locations and at different points in time representing the adoption of the Neolithic way of life in the Old world. Recent research on pressure knapping has led for the first time to a global thesis on this technique. The contributors to this seminal work combine research findings on pressure knapping from different cultures around the globe to develop a cohesive theory. This contribution to this volume represents a significant development to research on pressure knapping as well as the field of lithic studies in general. This work will be an important reference for anyone studying the Paleolithic, Mesolithic and Neolithic periods, lithic studies, technologies and more generally cultural transmission.

The Emergence of the Acheulean in East Africa and Beyond Rosalia Gallotti, Margherita Mussi, 2018-08-17
This edited volume presents current archaeological research and data from the major early Acheulean sites in East Africa and addresses three main areas of focus: 1 the tempo and mode of technological changes that led to the emergence of the Acheulean in East Africa; 2 new approaches to lithic collections including lithic technology analyses; and 3 the debated coexistence of the Developed Oldowan and the early Acheulean. The chapters are the proceedings from the workshop titled 'The Emergence of the Acheulean in East Africa' held at the University of Rome La Sapienza on September 12-13, 2013. The aim of the workshop was to bring together researchers currently working in this field in East Africa in order to define the characteristics and the evolution of the early Acheulean. The volume was expanded with some chapters on the preceding Oldowan, on the African fauna and on paleovegetation in the Acheulean in Asia and eventually on the Acheulean in Europe. The book is addressed to the scientific community and will be of interest to researchers, graduate students, archaeologists, paleontologists and paleoanthropologists. This volume is dedicated to the memory of Jean Chavaillon, March 25, 1925.
