Gcse Exam Boards 1993:

Curriculum: Construction and Critique Prof Alistair Ross, Alistair Ross, 2003-09-02 Although curriculum is central to the schooling process debates about it are rarely well informed Over the past ten years there has been a dearth of books that have informed the debate by examining curriculum in a broader context beyond the National Curriculum Ross in this refreshing re examination of the area opens up a more general debate on how the curriculum is shaped and the compromises made between different ideologies of the nature and purpose of education

Great Expectations Commission on the Social Sciences, 2017-10-19 The social sciences in the United Kingdom are extensive diverse and influential At any one time more than four million students study the social sciences in schools and about a half million students study social science in universities Total university income from the social sciences is at the four billion dollar level Beyond that many social scientists hold key positions in government business the media civil service and the voluntary sector Great Expectations reviews the status of the social sciences in Great Britain at the beginning of the twenty first century While making clear that work opportunities for social scientists are substantial and that levels of intellectual performance equal that of graduates in physics it provides a hard hitting empirically grounded examination of a near crisis situation The report goes far beyond what one conventionally expects in commissioned reports arguing that the academic treadmill driven by excessive accountability burdens reduces the originality and quality of much academic research The report emphasizes the ideological and parochial nature of much British social research As a result there is little applicability internationally even

less interdisciplinary work and at times an outright bias against the market economy as such The Commission Report is even handed tough minded and frank in discussing how it is that social science and new social and technical forces do not always mesh The optimism exuded is measured but genuine Great Expectations offers policy recommendations and scientific goals that can be serviceable not only in the United Kingdom but in all advanced societies in which social research is a central component of economic stability and development It is a superb reference volume enriched by original analysis and pungent clear headed writing Members of the commission include Professor David Rhind Vice Chancellor of the City University served as Chairman of the Commission Members included Huw Beynon Cardiff Patricia Broadbent Bristol Vicki Bruce Edinburgh Barry Buzzan LSE Sue Duncan Government Researcher Stuart Etherington National Council for Voluntary Organizations Janet Lewis Oxford Denise Lievesley UNESCO Richard Portes LBS Marc Renaud Research Council of Canada Michael Tonry Cambridge and David Walker The Guardian

State Sponsored Literature Asha Rogers,2020-03-05 Debates about the value of the literary rarely register the expressive acts of state subsidy sponsorship and cultural policy that have shaped post war Britain In State Sponsored Literature Asha Rogers argues that the modern state was a major material condition of literature even as its efforts were relative partial and prone to disruption Drawing from neglected and occasionally unexpected archives she shows how the state became an integral and conflicted custodian of literary freedom in the postcolonial world as beliefs about literature s public were radically challenged by the unrivalled migration to Britain at the end of Empire State Sponsored Literature retells the story of literature s place in post war Britain through original analysis of the institutional forces behind canon formation and contestation from the literature programmes of the British Council and Arts Council and the UK s fraught relations with UNESCO to GCSE literature anthologies and the origins of The Satanic Verses in migrant Camden The state did not shape literary production in a vacuum Rogers argues but its policies practices and priorities were also inexorably shaped in turn Demonstrating how archival work can potentially transform our understanding of literature this

book challenges how we think about literature's value by asking what state involvement has meant for writers readers institutions and the ideal of autonomy itself The Guardian Index ,1999 Cheating on Tests Gregory J.
