Silencing Refugees' Voices in Educational Practices Menşure Alkiş Küçükaydin,Hakan Ulum,Ömer Gökhan Ulum,2024-11-11 This book foregrounds silenced voices by correlating refugee experiences with educational practices while questioning how we address the educational rights of individuals affected by conflicts and wars Accordingly the book presents a novel perspective within the field of education Within the context of the most prevalent educational instruments textbooks this work endeavors to highlight the muted perspectives of immigrants in education and make significant advances towards resolving this problem Through extensive research and analysis of the relevant literature the authors shed light on the challenges refugee students face in their educational trajectories and offer innovative suggestions for adopting more equitable and inclusive approaches within our educational systems The book not only addresses an educational dilemma but also emphasizes humanity's shared responsibility Supporting the educational rights of refugees promotes not only their personal growth but also more tolerant compassionate and sustainable societies At the same time this work promotes a critical comprehension of refugee experiences in education by presenting both problems and solutions to the readership In this way it demonstrates how a more equitable and egalitarian approach to education can be adopted and it ultimately encourages readers to adopt a broader perspective on the world embracing humanitarian values and social responsibility

Proceedings of the National Science Council, Republic of China ,1999 What Are They Thinking? Page Keeley ,2014-04-01 Children are continually developing ideas and explanations about their natural world Some of these ideas are consistent with the science children are taught others differ significantly from scientific explanations Many of these ideas will follow students into adulthood if they remain hidden from the teacher and unresolved The challenge for teachers is to find ways to elicit these ideas and then use appropriate strategies to move students learning forward Page Keeley author of the bestselling NSTA Press series Uncovering Student Ideas in Science You don't have to become a mind reader to understand the ideas young students bring to science class This collection will help you draw out and then recognize what students know

or think they know about the natural world *What Are They Thinking* is a compendium of 30 Formative Assessment Probes columns from NSTA's elementary journal *Science and Children*. Each chapter provides a sample formative assessment probe, a set of interesting questions that root out commonly held, often mistaken ideas. Geared to elementary students, probe topics range from why you can see the Moon in the daytime to where water goes when it evaporates to what is or isn't a rock. Your students' answers to each probe will help you take a step back and figure out how to guide them from where they are conceptually to where they need to be. Accompanying teacher notes, easy to grasp explanations and advice that tell you how to encourage evidence-based discussion and then monitor students' understanding. A bonus feature: a set of study group questions written especially for this compendium by award-winning author Page Keeley. So forget about acquiring psychic powers. Instead, turn to *What Are They Thinking* to transform both your teaching and your students' learning about science.

Teaching with Purpose Ann K. Fathman, John E. Penick, David T. Crowther, Robin Lee Harris, 2006 Making a case for a research-based teaching rationale. Elements of a research-based rationale. Developing a research-based rationale. Implementing your rationale and becoming a mentor. *Hands-On Science and Technology for Ontario, Grade 2* Jennifer E. Teaching Science in Elementary and Middle School Joseph S. Krajcik, Charlene M. Czerniak, 2014-01-23 *Teaching Science in Elementary and Middle School* offers in-depth information about the fundamental features of project-based science and strategies for implementing the approach. In project-based science classrooms, students investigate, use technology, develop artifacts, collaborate, and make products to show what they have learned. Paralleling what scientists do, project-based science represents the essence of inquiry and the nature of science. Because project-based science is a method aligned with what is known about how to help all children learn science, it not only helps students learn science more thoroughly and deeply, it also helps them experience the joy of doing science. Project-based science embodies the

principles in A Framework for K 12 Science Education and the Next Generation Science Standards Blending principles of learning and motivation with practical teaching ideas this text shows how project based learning is related to ideas in the Framework and provides concrete strategies for meeting its goals Features include long term interdisciplinary student centered lessons scenarios learning activities and Connecting to Framework for K 12 Science Education textboxes More concise than previous editions the Fourth Edition offers a wealth of supplementary material on a new Companion Website including many videos showing a teacher and class in a project environment
