**A Question of Worth** Chris Steed, 2016-09-14 We live in a world that has become a resource a world conditioned by the progressive domination of a monetary scale applied across the board Our value and worth are contingent upon what we earn on what we own Amidst the increasing financialisation that characterises much of the globe the prevailing ethos is that the only values we can usefully measure are those that can be quantified and expressed in terms of economics Yet economic value and the value of the human are closely connected erode the economic and you erode the personal In the global economic crash of recent years it has been people who have been under assault not just financial value The vulnerability of a society shaped solely by economic and monetised transactions is exposed when the economy and the monetisation of everything fails When the economic machine seizes up it is people who are devalued and dumped Drawing upon his experience in government education and the Church the author asks Must we be a market society

as well as a market economy Can we devise a non economic account of describing human value and worth Christopher Steed argues that the really important issues that frame the contemporary human situation are those that cannot be measured Quality is also vital to human flourishing what after all is wealth for In this timely and important work the author calls for a wider concept of value one that encompasses both economic value and human value and for a society that cultivates the importance of the human

**Class Clowns** Jonathan A. Knee,2016-11-29 The past thirty years have seen dozens of otherwise successful investors try to improve education through the application of market principles They have funneled billions of dollars into alternative schools online education and textbook publishing and they have with surprising regularity lost their shirts In Class Clowns professor and investment banker Jonathan A Knee dissects what drives investors efforts to improve education and why they consistently fail Knee takes readers inside four spectacular financial failures in education Rupert Murdoch s billion dollar effort to reshape elementary education through technology the unhappy investors including hedge fund titan John Paulson who lost billions in textbook publisher Houghton Mifflin the abandonment of Knowledge Universe Michael Milken s twenty year mission to revolutionize the global education industry and a look at Chris Whittle founder of EdisonLearning and a pioneer of large scale transformational educational ventures who continues to attract investment despite decades of financial and operational disappointment Although deep belief in the curative powers of the market drove these initiatives it was the investors failure to appreciate market structure that doomed them Knee asks What makes a good education business By contrasting rare successes he finds a dozen broad lessons at the heart of these cautionary case studies Class Clowns offers an important guide for public policy makers and guardrails for future investors as well as an intelligent expos for activists and teachers frustrated with the repeated underperformance of these attempts to shake up education

**The Complacent Class** Tyler Cowen, 2017-02-28 A Wall Street Journal and Washington Post Bestseller Tyler Cowen's blog Marginal Revolution is the first thing I read every morning And his brilliant new book The Complacent Class has been on my nightstand after I devoured it in one sitting I am at round the clock Cowen saturation right now Malcolm Gladwell Since Alexis de Tocqueville restlessness has been accepted as a signature American trait Our willingness to move take risks and adapt to change have produced a dynamic economy and a tradition of innovation from Ben Franklin to Steve Jobs The problem according to legendary blogger economist and best selling author Tyler Cowen is that Americans today have broken from this tradition we're working harder than ever to avoid change We're moving residences less marrying people more like ourselves and choosing our music and our mates based on algorithms that wall us off from anything that might be too new or too different Match.com matches us in love Spotify and Pandora match us in music Facebook matches us to just about everything else Of course this matching culture brings tremendous positives music we like partners who make us happy neighbors who want the same things We're more comfortable But according to Cowen there are significant collateral downsides attending this comfort among them heightened inequality and segregation and decreased incentives to innovate and create The Complacent Class argues that this cannot go on forever We are postponing change due to our near sightedness and extreme desire for comfort but ultimately this will make change when it comes harder The forces unleashed by the Great Stagnation will eventually lead to a major fiscal and budgetary crisis impossibly expensive rentals for our most attractive cities worsening of residential segregation and a decline in our work ethic The only way to avoid this difficult future is for Americans to force themselves out of their comfortable slumber to embrace their restless tradition again

span that goes from the late Qing to our days the authors show that few ideas have been as influencing as utopia which has compellingly shaped the imaginaries that underpin China's historical change Utopianism contributed to the formation of the Chinese state itself shaping the thought of key figures of the late Qing and early Republican eras such as Kang Youwei and Sun Yat sen and outlived the labyrinthine debates of the second half of the twentieth century both under Mao's rule and during the post socialist era Even in the current times of dystopian narratives a period in which utopia seems to be less influential than in the past its manifestations persistently provide lifelines against fatalism or cynicism This collection shows how profoundly utopian ideas have nurtured both the thought of crucial figures during these historical times the new generation of mainland Chinese and Sinophone intellectuals and the hopes of twenty first century Hong Kong activists Wang Leung and Zhang's collection is a timely contribution to utopian studies built on consistent coherent boundary crossing approaches Interdisciplinary in its very sense the essays bring intellectual history literary studies philosophy and political theories together in dialogue Of particular note are the essays that situate Hong Kong in a literary tradition that connects China Hong Kong and the beyond Mingwei Song Wellesley College Utopia and Utopianism in the Contemporary Chinese Context is an impressive intellectual undertaking The essays are highly engaging and offer powerful multi faceted approaches to utopianism in contemporary Chinese thought and practice Stimulating and informative the book as a whole addresses the dynamic interplay between the utopian and dystopian thereby inspiring clarity in political thought and action in the present moment Robin Visser University of North Carolina at Chapel Hill
