Effectiveness of teachers' guides in the Global South Benjamin Piper, Yasmin Sitabkhan, Jessica Mejia, Kellie Betts, 2018-05-10 This report presents the results of RTI International Education s study on teachers guides across 13 countries and 19 projects Using quantitative and qualitative methods we examine how teachers guides across the projects differ and find substantial variation in the design and structure of the documents We develop a scripting index so that the scripting levels of the guides can be compared across projects The impact results of the programs that use teachers guides show significant impacts on learning outcomes associated with approximately an additional half year of learning showing that structured teachers guides contribute to improved learning outcomes During observations we find that teachers make a variety of changes in their classroom instruction from how the guides are written showing that the utilization of structured teachers guides do not create robotic teachers unable to use their own professional skills to teach children Unfortunately many changes that teachers make reduce the amount of group work and interactivity that was described in the guides suggesting that programs should encourage teachers to more heavily utilize the instructional routines designed in the guide The report includes a set of research based guidelines that material developers can use to develop teachers guides that will support effective instructional practices and help improve learning outcomes The key takeaway from the report is that structured teachers guides improve learning outcomes but that overly scripted teachers guides are somewhat less effective than simplified teachers guides that give specific guidance to the teacher but are not

Bringing the Common Core Math Standards to Life Yvelyne Germain-McCarthy, Ivan Gill, 2014-11-20

Provides a clear explanation of the big shifts happening in the classroom as a result of the Common Core State Standards Offers real examples and detailed analyses of how exemplary teachers are using engaging strategies across the curriculum Includes practical ready to use tools you can take back to your classroom *The Wrong Direction for Today's Schools* Ernest J. Zarra III, 2015-07-22 The Wrong Direction for Today's Schools The Impact of Common Core on American Education is an in depth analysis of the newest national American education fad intended to replace the 2002 incarnation of the ESEA No Child Left Behind Zarra delves into the seeds that produced the Common Core Standards as well as the groups involved in the political and corporate pressure to completely revamp America's K 16 education system The author lays out a strong case for political motives involving the advancement for nationalized education such as those found in select European and Asian nations Zarra also follows the funding and provides solid documentation and analysis of international and national assessments and how the funding and assessments proved pivotal in the overhaul of American education After an analysis of the underpinnings of the Common Core Standards Zarra critiques the myths and facts of the Common Core and balances these with the emerging realities impacting average Americans and their families Zarra's book is a must read and will prove to be extremely useful to all who are concerned about public private and homeschool education in America

Instructional Practices with and without Empirical Validity Bryan G. Cook, Melody Tankersley, Timothy J. Landrum, 2016-07-06 It is important for Stakeholders to be aware of both practices supported as effective as well as ineffective for students with learning and behavioral disabilities in order to provide instruction that results in improved learner outcomes in critical areas of education Political Pressures on Educational and Social Research Karen Trimmer, 2016-05-12 Political Pressures on

Educational and Social Research draws upon a variety of theoretical and methodological approaches to consider the problems that can arise when research findings diverge from political directions for policy. Chapters explore the impacts this can have on the researchers as well as the influence it has on the research including the methodology and the publication of results. The book offers innovative ways of seeing how these connect, overlap and interact, revealing particular issues of concern for researchers and evaluators in the context of research internationally. Key topics include the power and positioning of research, evidence based policy development, ethics and the importance of research that seeks to explore and discover knowledge. The book is divided into two sections. The first presents chapters from international academics which provide a theoretical underpinning and discussion of power, policy, ethics and their influence on research, resourcing, autonomy, purpose and methodology. The second section explores specific case studies and instances from the authors' own experiences in the field. This book offers an interesting and enlightening insight into the sometimes political nature of research and will appeal to researchers, evaluators and postgraduate students in the fields of education and the social sciences. It will be of particular interest to those studying research methods.

Learning to Love Assessment Sherah Betts Carr, Anaya L. Bryson, 2017-07-07. *Learning to Love Assessment: Unraveling Complexities and Providing Solutions* provides educators and stakeholders with two very critical components of the current assessment dialogue. One is to understand the historical and legislative components and perceptions that have created the current climate of school accountability measures. The second is to deconstruct these complexities and offer concrete solutions for making classroom assessment an enjoyable, productive and student-owned endeavor. The bulk of this book focuses on solutions. It offers concrete techniques for educators at all levels to cultivate and implement effective classroom assessment strategies. Over 50 unique strategies for formative, student, peer and self-assessment, data dialogues, technological tools and PBL3 problem project and performance based assessments are detailed. A special feature of the book includes access to a companion web site that contains links and handouts that coordinate with the various classroom assessment strategies. In addition, each chapter contains reflective pre and post reading questions so the book can be effectively used to supplement professional learning or educational courses.

Frontiers in the Acquisition of Literacy Claire M. Fletcher-Flinn, 2015-09-28. Learning to read and to spell are two of the most important cultural skills that must be acquired by children and for that matter anyone learning a second language. We are not born with an innate ability to read. A reading system of mental representations that enables us to read must be formed in the brain. Learning to read in alphabetic orthographies is the acquisition of such a system which links mental representations of visual symbols (letters in print, words) with pre-existing phonological sound and semantic comprehension cognitive systems for language. Although spelling draws on the same representational knowledge base and is usually correlated with reading, the acquisition processes involved are not quite the same. Spelling requires the sequential production of letters in words and at beginning levels there may not be a full degree of integration of phonology with its representation.

by the orthography Reading on the other hand requires only the recognition of a word for pronunciation Hence spelling is more difficult than reading and learning to spell may necessitate more complete representations or more conscious access to them The learning processes that children use to acquire such cognitive systems in the brain and whether these same processes are universal across different languages and orthographies are central theoretical questions Most children learn to read and spell their language at the same time thus the co ordination of these two facets of literacy acquisition needs explication as well as the effect of different teaching approaches on acquisition Lack of progress in either reading and or spelling is also a major issue of concern for parents and teachers necessitating a cross disciplinary approach to the problem encompassing major efforts from researchers in neuroscience cognitive science experimental psychology and education The purpose of this Research Topic is to summarize and review what has been accomplished so far and to further explore these general issues Contributions from different perspectives are welcomed and could include theoretical computational and empirical works that focus on the acquisition of literacy including cross orthographic research
