Grills, 2015-11-19 A Choice Magazine Outstanding Academic Title of 2017 School based mental health professionals intervene daily to address a variety of student mental health concerns From challenges that arise in the educational context to those carried over from home from managing daily care to handling emergent traumatic events they must be prepared for an extremely varied work life While some of the most common issues recur with such frequency that they may seem straightforward to address others crop up with changing student populations Each chapter in this volume addresses a different key topic giving current and future professionals an overview of the most recent scholarship on the topic and then outlining evidence based interventions With chapters on learning disabilities substance abuse bullying internalizing and externalizing behaviors trauma LGBT youth and more this book prepares school based mental health professionals to face some of the most difficult common and politicized issues affecting students today *A Brighter Future* Richard Holt, Daphne Greenwood, 2014-12-18 As the United States continues its slow climb out of the Great Recession it is important to focus on new directions to improve the standard of living in America This book explores what is behind a faltering standard of living in the United States since the early 1980s and what can be done to restore it The book is uniquely valuable in going beyond mainstream thinking about how to restore prosperity Economics has traditionally equated economic growth increases in per capita income with improvements in quality of life and the standard of living This book questions that assumption The different chapters in the book show the standard of living as being more than income to include many non market aspects such as access to public goods roads clean air and water schools parks and museums intangible aspects of quality of life such as equity and a sense of community and broadly based economic opportunities This means that improving the standard of living is a multi dimensional challenge rather than one of solely increasing aggregate demand productivity or GDP This book embodies a pluralistic approach and draws on the expertise of a wide array of thinkers The intended audience is for various courses offered in economics sociology political science public policy programs and in environmental and ecological studies
