*Criminal Sentencing as Practical Wisdom* Graeme Brown, 2017-06-01 How do judges sentence In particular how important is judicial discretion in sentencing Sentencing guidelines are often said to promote consistency but is consistency in sentencing achievable or even desirable Whilst the passing of a sentence is arguably the most public stage of the criminal justice process there have been few attempts to examine judicial perceptions of and attitudes towards the sentencing process Through interviews with Scottish judges and by presenting a comprehensive review and analysis of recent scholarship on sentencing including a comparative study of UK Irish and Commonwealth sentencing jurisprudence this book explores these issues to present a systematic theory of sentencing Through an integration

of the concept of equity as particularised justice the Aristotelian concept of phronesis or practical wisdom the concept of value pluralism and the focus of appellate courts throughout the Commonwealth on sentencing by way of instinctive synthesis it is argued that judicial sentencing methodology is best viewed in terms of a phronetic synthesis of the relevant facts and circumstances of the particular case The author concludes that sentencing is best conceptualised as a form of case orientated concrete and intuitive decision making one that seeks individualisation through judicial recognition of the profoundly contextualised nature of the process *The New Law Journal* ,2004 *How Much For A Leg?* William J. **Damages and Human Rights** Jason NE Varuhas, 2016-05-19 Winner of the 2018 Inner Temple New Authors Book Prize and the 2016 SLS Peter Birks Prize for Outstanding Legal Scholarship Damages and Human Rights is a major work on awards of damages for violations of human rights that will be of compelling interest to practitioners judges and academics alike Damages for breaches of human rights is emerging as an important and practically significant field of law yet the rules and principles governing such awards and their theoretical foundations remain underexplored while courts continue to struggle to articulate a coherent law of human rights damages The book's focus is English law but it draws heavily on comparative material from a range of common law

jurisdictions as well as the jurisprudence of international courts The current law on when damages can be obtained and how they are assessed is set out in detail and analysed comprehensively The theoretical foundations of human rights damages are examined with a view to enhancing our understanding of the remedy and resolving the currently troubled state of human rights damages jurisprudence The book argues that in awarding damages in human rights cases the courts should adopt a vindicatory approach modelled on those rules and principles applied in tort cases when basic rights are violated Other approaches are considered in detail including the current mirror approach which ties the domestic approach to damages to the European Court of Human Rights approach to monetary compensation an interest balancing approach where the damages are dependent on a judicial balancing of individual and public interests and approaches drawn from the law of state liability in EU law and United States constitutional law The analysis has important implications for our understanding of fundamental issues including the interrelationship between public law and private law the theoretical and conceptual foundations of human rights law and the law of torts the nature and functions of the damages remedy the connection between rights and remedies the intersection of domestic and international law and the impact of damages liability on public funds and public administration The book was the winner of the 2016 SLS Peter Birks Prize for Outstanding Legal

**House of Commons - Transport Committee: Cost of Motor Insurance: Whiplash - HC 117** Great Britain: Parliament: House of Commons: Transport Committee,2013-07-31 Whiplash injuries can have debilitating consequences for those who suffer them However some of the increase in whiplash claims will have been due to fraud or exaggeration The Government must tighten up the requirements for motor insurance claims and ensure that insurers honour their commitment to reduce premiums The Government should consider requiring claimants to provide proof that they have either been seen by a doctor or attended A E shortly after the accident The MPs also note that their previous recommendation on making the links between insurers and other parties involved with claims more transparent has been ignored The absence of comprehensive statistics about road traffic accidents means that it is impossible to relate the increasing number of personal injury claims in recent years to the number of accidents Data collection about road accidents needs to be improved help to assist detection of fraudulent

personal injury claims and help highways authorities improve road safety by targeting spending on accident black spots The Committee also supports the proposal for an accreditation scheme for medical practitioners who provide medical reports in relation to whiplash claims Access to justice could also be impaired by Government proposals to switch whiplash claims between 1 000 and 5 000 to the small claims court particularly for people who do not feel confident to represent themselves against insurers who will use legal professionals to contest claims Ways in which use of the small claims track could be combined with the routine submission of expert evidence should be considered
