

CHAPTER 3

Adjusting the Accounts

EXERCISE 3.3

- (a) Accrual-basis accounting records the transactions that change a company's financial statements in the periods in which the events occur rather than in the periods in which the company receives or pays cash. Information presented on an accrual basis is useful because it reveals relationships that are likely to be important in predicting future results. Conversely, under cash-basis accounting, revenue is recorded only when cash is received, and an expense is recognized only when cash is paid. As a result, the cash basis of accounting often leads to misleading financial statements.
- (b) Politicians might desire a cash-basis accounting system over an accrual-basis system because if an accrual-accounting system is used, it could mean that billions in government liabilities presently unrecorded would have to be reported in the federal budget immediately. The recognition of these additional liabilities would make the deficit even worse. This is not what politicians would like to see and be held responsible for.

- (c) Dear Government Official,

It is my understanding, after having taken a beginning course in accounting principles, that governments use a cash-basis system rather than an accrual-basis accounting system.

I am shocked at such a practice! There must be billions of dollars of liabilities hidden in many contracts that have not been recorded yet for the federal deficit would dramatically increase if we were to implement an accrual system, but in all fairness, we citizens should be given a more accurate picture of what our government is up to.

Sincerely,

CONCERNED STUDENT
