Botanical Garden really knows how to throw a Christmas party for people and animals and WinterFest at Kings Island provides much needed warmth in the winter chill Many city squares display Christmas trees bathed in lights and offer horse drawn carriages or a skating rink But only Cincinnati offers Santa rappelling down the face of a building and an ice skating rink with bumper cars Join local author Wendy Hart Beckman for a merry jaunt through Yuletide years gone by [Climate Migration and Security](#) Ingrid Boas, 2015-05-01 Climate migration as an image of people moving due to sea level rise and increased drought has been presented as one of the main security risks of global warming The rationale is that climate change will cause mass movements of climate refugees causing tensions and even violent conflict Through the lens of climate change politics and securitisation theory Ingrid Boas examines how and why climate migration has been presented in terms of security and reviews the political consequences of such framing exercises This study is done through a macro micro analysis and concentrates on the period of the early 2000s until the end of September 2014 The macro level analysis provides an overview of the coalitions of states that favour or oppose security framings on climate migration It shows how European states and the Small Island States have been key actors to present climate migration as a matter of security while the emerging developing countries have actively opposed such a framing The book argues that much of the division between these states alliances can be traced back to climate change politics As a next step the book delves into UK India interactions to provide an in depth analysis of these security framings and their connection with climate change politics This micro level analysis demonstrates how the UK has strategically used security framings on climate migration to persuade India to commit to binding targets to reduce their greenhouse gas emissions The book examines how and why such a strategy has emerged and most importantly to what extent it has been successful Climate Migration and Security is the first book of its kind to examine the strategic usage of security arguments on climate migration as a political tool in climate change politics Original theoretical empirical and policy related insights will provide students scholars and policy makers with the necessary tools to review the effectiveness of these framing strategies for the purpose of climate change diplomacy and delve into the wider implications of these framing strategies for the governance of climate change

Garnett,G Barry Baker,2021-12 The Action Plan for Australian Birds 2020 is the most

comprehensive review of the status of Australia's avifauna ever attempted. The latest in a series of action plans for Australian birds that have been produced every decade since 1992, it is also the largest. The accounts in this plan have been authored by more than 300 of the most knowledgeable bird experts in the country and feature far more detail than any of the earlier plans. This volume also includes accounts of over 60 taxa that are no longer considered threatened, mainly thanks to sustained conservation action over many decades. This extensive book covers key themes that have emerged in the last decade, including the increasing impact of climate change as a threatening process, most obviously in Queensland's tropical rainforests where many birds are being pushed up the mountains. However, the effects are also indirect, as happened in the catastrophic fires of 2019/20. Many of the newly listed birds are subspecies confined to Kangaroo Island, where fire destroyed over half the population. But there are good news stories too, especially on islands where there have been spectacular successes with predator control. Such uplifting results demonstrate that when action plans are followed by action on the ground, threatened species can indeed be recovered and threats alleviated.

Australian Island Arks Dorian Moro, Derek Ball, Sally Bryant, 2018-02. Australia is the custodian of a diverse range of continental and oceanic islands. From Heard and Macquarie in the sub-Antarctic to temperate Lord Howe and Norfolk to the tropical Cocos Keeling Islands and the islands of the Great Barrier Reef, Australia's islands contain some of the nation's most iconic fauna, flora, and ecosystems. They are a refuge for over 35% of Australia's threatened species and for many others declining on mainland Australia. They also have significant cultural value, especially for Indigenous communities, and economic value as centres for tourism. *Australian Island Arks* presents a compelling case for restoring and managing islands to conserve our natural heritage. With contributions from island practitioners, researchers, and policy makers, it reviews current island management practices and discusses the need and options for future conservation work. Chapters focus on the management of invasive species, threatened species recovery, conservation planning, Indigenous cultural values and partnerships, tourism enterprises, visitor management, and policy and legislation. Case studies show how island restoration and conservation approaches are working in Australia and what the emerging themes are for the future. *Australian Island Arks* will help island communities, managers, visitors, and decision makers to understand the current status of Australia's islands, their management challenges, and the opportunities that exist to make best use of these iconic landscapes.
