ProTec AIS Operation

2.1.   Operation

The L–3 ProTec has been designed to require minimal user interaction during normal operation. The interface consists of an integral alphanumeric display with alphanumeric keypad providing for data entry, retrieval and display.

2.1.1.   Minimum Keyboard Display

The L–3 ProTec includes and integral MKD which is fully IMO compliant. It is recommended that the MKD **should not act as the primary display** due to limitations in data presentation options. It should be used for configuration of the hardware and entry of vessel and voyage specific data, which is required infrequently. It may also serve as a backup display if the external display were to malfunction. L–3 strongly recommends that the AIS Target Display Software (TDS) be used as the primary AIS display system and this software is available from the hardware supplier. TDS is a basic yet powerful graphic display software compatible with Windows™ which provides numerous display options for the AIS data. Contact L–3 Communications for further information and acquisition. The front face of the L–3 ProTec contains the following controls.
