Transgression in the Architectures of After-Modernity Carmen Popescu, 2025-09-03 In architecture transgressive acts have always been a reality in spite of rules and canons that have defined the discipline and its extended field However in recent decades their frequency and radicality have surged from rather random marginal and or idiosyncratic phenomena While their sudden rise can be explained as a reaction to the compulsive normativity of modernity the deeper roots are to be sought elsewhere the recent waves of transgressiveness are intimately linked to the hypercrisis affecting our world today spanning ecological political economic and social dimensions and catalysing fundamental mutations and disorders Some of these transgressive acts are motivated by a desire to dismantle a malfunctioning system but more often than not breaking the rules has become an inherent survival tactic amid urgent social challenges In our era of after modernity transgression emerges not just as an act of defiance but reveals a new paradigm at work a critical framework for reimagining the built environment challenging established orders and advocating for the rights of marginalised populations Drawing on a rich

array of theoretical insights and empirical case studies from multiple countries this volume provides a unique forward looking perspective on transgressive acts in architecture as responses to today's ecological political economic and social crises

The Locations of (World) Literature ,2025-02-03 Location matters for critics readers and texts This book explores the notion of location not simply as geographical historical or cultural context but as a standpoint a position an orientation a necessarily partial and particular perspective however ample it may be from which writers represent and imagine their worlds However the constraint of location in the form of a reductive geographical marker has been felt most acutely by writers of the Global South This book explores how modern and contemporary writers from Africa and South Asia consider their place in the world in world literature and in the wider geographical regions or national literary histories which their work is identified with What worlds do these literatures simultaneously inhabit and create What networks do writers and institutions specific genres and works of literature but also circuits of readership translation and publishing produce And what are the imagined or discrepant geographies the different cosmopolitanisms that may be invented in the process This ground up approach from Lagos Algier Niamey Addis Ababa or Allahabad in English and in French but also in Swahili Malayalam Amharic Urdu Arabic Persian or Pulaar can pluralize a map whose entanglements and complexities face the risk of being ironed out by reified conceptualizations of literature within global macro systems *Inequality and Uncertainty* Marta Smagacz-Poziemska,M. Victoria Gómez,Patrícia Pereira,Laura Guarino,Sebastian Kurtenbach,Juan José Villalón,2019-11-13 It is not possible to ignore the fact that cities are not only moving vibrant and flourishing spaces promising hope for better quality of life but that they also accumulate and reflect significant problems This book explores the relational and dynamic nature of urban inequalities including their visible and invisible forms By using the rather elusive term of uncertainty the authors zoom in on specific aspects of urban inequalities that are difficult to measure yet are acutely sensed and experienced by people and more and more often perceived as unfair Here in the recognition of inequalities as unjust and in the disagreement with the status quo lies a positive aspect of uncertainty which can lead to a social awakening and more active citizenship *Psychotropic Drugs, Prevention and Harm Reduction* Imaine Sahed,Antony Chaufon,2017-08-30 This book promotes the interaction between research and professional practices in the field of prevention and harm reduction Through the scientific work and experience of human and social sciences researchers and medical social actors research and action assist one another in illuminating the problems associated with the consumption of psychotropic drugs and in developing intervention strategies Over the course of several chapters contributed by attendees of the Psychotropics Prevention and Harm Reduction Put to the Test By Human and Social Sciences workshop a range of varied themes are explored within the scope of drugs and their uses Both the socio historical context of drug uses and the construction of prevention and harm reduction public policies in light of scientific knowledge are covered as well as the issue of release mobilization and or negotiation of prevention and harm reduction standards both for professionals and drug users Presents acts that formalize the first day of study initiated by the network of young researchers at the Psychotropes and Societies Intervention Offers a multidisciplinary view on the understanding of the use of psychotropic substances Includes
