La Constitution Sarkozy:

Revolutionary Constitutions Bruce Ackerman, 2019-05-13 A robust defense of democratic populism by one of America's most renowned and controversial constitutional scholars the award winning author of *We the People* Populism is a threat to the democratic world fuel for demagogues and reactionary crowds or so its critics would have us believe But in his award winning trilogy *We the People* Bruce Ackerman showed that Americans have repeatedly rejected this view Now he draws on a quarter century of scholarship in this essential and surprising inquiry into the origins successes and threats to revolutionary constitutionalism around the world He takes us to India South Africa Italy France Poland Burma Israel and Iran and provides a blow by blow account of the tribulations that confronted popular movements in their insurgent campaigns for constitutional democracy Despite their many differences populist leaders such as Nehru Mandela and de Gaulle encountered similar dilemmas at critical turning points and each managed something overlooked but essential Rather than deploy their charismatic leadership to retain power they instead used it to confer legitimacy to the citizens and institutions of constitutional democracy Ackerman returns to the United States in his last chapter to provide new insights into the Founders acts of constitutional statesmanship as they met very similar challenges to those confronting populist leaders today In the age of Trump the democratic system of checks and balances will not survive unless ordinary citizens rally to its defense *Revolutionary Constitutions* shows how activists can learn from their predecessors successes and profit from their mistakes and sets up Ackerman's next volume which will address how elites and insiders co opt and destroy the momentum of revolutionary movements

The Presidents of the French Fifth Republic D. Bell, J. Nester, 2014-12-16 This book explores the following What is the art of power What is the art of French power How did Charles de Gaulle understand and assert power establishing the Fifth Republic and breaking centuries of political instability How well or poorly have his successors wielded the art of French power to define defend or enhance French interests

Parliamentary Committees in the Policy Process Sven T. Siefken, Hilmar Rommetvedt, 2021-08-19 This book sheds new light on the often shadowy but essential role of committees which exist in modern parliaments around the globe and it questions the conventional notion that the real work of parliament happens in committees Renowned country specialists take a close look at what goes on in committees and how it matters for policy making While committees are seen as the central place where policy is made they often hold their sessions closed to the public and calls for transparency are growing To understand this black box it is necessary to look within but also beyond the walls of the committee rooms and parliament buildings Bringing together formal and informal aspects rules and practices shows that committees are not a paradise of policy making They have great relevance nonetheless as crystallization points in

the policy networks as drivers for division of labor and for socialization and the integration of MPs The new insights presented in this book will be of interest to scholars students and professionals in parliamentary affairs legislative studies government and comparative politics They are also relevant for political analysts journalists and policymakers *French Politics and Society* Alistair Cole, 2017-04-21 *French Politics and Society* is the ideal companion for all students of France and French politics with a strong reputation for its lucidity and lively exposition of the French polity This third edition remains a highly readable text and offers a broad critical and comprehensive understanding of French politics The book provides an excellent description of French institutions and ensures readers access to background information through discussing historical developments political forces public policy and the evolution of important aspects of French society Key updates for the third edition include extensive updates including the Chirac Sarkozy and Hollande presidencies inclusion of constitutional and state reform coverage since 2008 the French party system and evolution of the French left and right more on France's positioning with regards to Brussels and the impact of the European economic crisis *French Politics and Society* is essential reading for all undergraduates studying French politics French studies European studies or comparative politics **The Senate of the Fifth French Republic** P. Smith, 2009-10-21 Paul Smith examines how the Senate has attempted since 1958 to locate itself within the French semi presidential system how it asserts its place in relation to the President Government and National Assembly and how it has sought in recent years to develop an autonomous and particular sense of identity

French Global Christie McDonald, Susan Rubin Suleiman, 2010 Recasting French literary history in terms of the cultures and peoples that interacted within and outside of France's national boundaries this volume offers a new way of looking at the history of a national literature along with a truly global and contemporary understanding of language literature and culture The relationship between France's national territory and other regions of the world where French is spoken and written most of them former colonies has long been central to discussions of Francophonie Boldly expanding such discussions to the whole range of French literature the essays in this volume explore spaces mobilities and multiplicities from the Middle Ages to today They rethink literary history not in terms of national boundaries as traditional literary histories have done but in terms of a global paradigm that emphasizes border crossings and encounters with others Contributors offer new ways of reading canonical texts and considering other texts that are not part of the traditional canon By emphasizing diverse conceptions of language text space and nation these essays establish a model approach that remains sensitive to the specificities of time and place and to the theoretical concerns informing the study of national literatures in the twenty first century **The Politics of Dissensus** Kari Palonen, José María Rosales, Tapani Turkka, 2014-05-05 *The Politics of Dissensus* inverts the traditional perspective on the study of parliamentary politics by focusing on its less obvious and less well known aspects Dissensus instead of consensus becomes the condition for the intelligibility of parliamentary politics Such politics is indebted to the rhetorical culture of addressing issues from opposite perspectives and debating the alternatives pro et contra no motion is

approved without a thorough examination of and confrontation among imaginable alternatives Establishing the openness of political debating parliamentarism has become a distinctive historical contribution to the rise of parliamentary democracy Parliament in Debate refers to the paradigmatic institution for political deliberation the debates surrounding its legislative activity as well as the supervision of government and administration Parliament has become a fascinating object of scrutiny as a political institution adopted and developed by different political traditions In a nutshell the book retrieves the study of parliamentary politics to present political theory and action in the parliamentary mode It is a book on the relevance of parliamentarism to the study of politics and a book on the comparative conceptual and institutional history of parliamentary politics The Politics of Dissensus Parliament in Debate is the outcome of an international team of contributors coordinated by two ongoing research projects relying on a long lasting international cooperation namely the Academy of Finland project The Politics of Dissensus and the Spanish National Research Fund projects The Rhetorics of Democracy and The Civic Constellation

Law, Lawyers and Race Mathias Möschel, 2014-09-15 Critical Race Theory CRT is virtually unheard of in European scholarship especially among legal scholars Law Lawyers and Race Critical Race Theory from the United States to Europe endeavours to fill this gap by providing an overview of the definition and consequences of CRT developed in American scholarship and describing its transplantation and application in the continental European context The CRT approach adopted in this book illustrates the reasons why the relationship between race and law in European civil law jurisdictions is far from anodyne Law plays a critical role in the construction subordination and discrimination against racial minorities in Europe making it comparable albeit in slightly different ways to the American experience of racial discrimination Anti-Semitism Islamophobia anti Roma and anti Black racism constitute a fundamental factor often tacitly accepted in the relationship between law and race in Europe Consequently the broadly shared anti race and anti racist position is problematic because it acts to the detriment of victims of racism while privileging the White Christian male majority This book is an original exploration of the relationship between law and race As such it crosses the disciplinary divide furthering both legal scholarship and research in Race and Ethnicity Studies

Insight Turkey - Winter 2018 (Vol. 20, No. 3): Fault Lines in The European Union, The European Union is a success story It brought enemy countries together combined their powers fostered economic and social development successfully competed with the American market and also resisted against the Soviet expansionism As the most developed supranational international organization in modern history the EU maintained Europe at the center of world politics With the end of the Cold War the member states attempted to transform the organization from an economic institution into a political and military structure having the ultimate goal to create a federal state like institution However after unexpected changes in the global system and the emergence of new political actors the EU began to experience many difficulties As a result today the EU is in a political deadlock and it seems that the continental unity achieved by the EU has begun to shatter The reasons behind this are several First of all increasing

illiberalism and authoritarianism in the West began to threaten the main liberal values that provide the expedient environment for social development and also for peaceful coexistence. The increase of xenophobia, racism, fascism, ultra nationalism and anti Islamism uncovered the illiberal European traditions. As a result we now witness a division not only between Europeans and non Europeans but also between Europeans themselves. Namely there are many fault lines which divide and alienate the European countries from one another. For instance there is an increasing friction between relatively robust economies of the north and volatile economies of the south. Second the member states of the EU have lost their common other enemy. Throughout the Cold War most European countries stood behind the U S in order to struggle against all global and regional threats such as the spread of communism and the expansionism of the Soviet Union. However today European countries have different national priorities. For instance while some European countries have begun to spend more in their defense budget others refuse to increase their defense allocation and continue to prioritize economic development. A similar division can be seen in terms of the stance towards Russia. Third the future of the EU is closely associated with the future of NATO. Maintaining the unity in military and security issues requires cooperation in other sectors especially in the economy. Many European countries are not happy with what the U S does regarding NATO. The Trump Administration has been following a nationalist unilateral and therefore conflictual economic policy towards Europe. Considering the European trade surplus with the U S Trump declared Europe as bad as China. These developments have further deepened the gap between the EU and the U S. Fourth the EU institutionalization was at its peak after the collapse of the Cold War system and the EU enlargement towards Eastern Europe. Nevertheless it faced important challenges stemming from new topics such as defense and foreign policy and the accession of possible new members. Following the accession of Eastern European states the gap between the most advanced members and relatively less developed states widened. Consequently the EU lost its attractiveness for many European states and the British who did not want to share the burden of other member states decided to leave the EU. This was the first step towards disintegration of the EU and this backward tendency will most probably continue. Fifth due to increasing shallowness and mediocrity European politics has lost its visionary outlook and strategic depth. The new generation of European politicians on the whole lack the visionary outlook of the previous generations. They are trapped in conjuncture and populist policies with short term concerns or gains. That is they just try to save the day. This new political elite in Europe does not believe in EU values such as pluralism and the win win strategy. Some EU members are reluctant to share the burden of other members. Southern tier EU countries have been experiencing economic problems and struggling against the influx of refugees but the northern tier countries are relatively free of these problems and do not want to import these issues into their domestic politics. Last but not least European countries have been otherizing migrants and foreigners. In this context Turkey has been considered as the main other for many years. It seems that when it comes to Turkey the EU institutions and member countries freeze most of their differences and problems and

prioritize Turkey's domestic and foreign developments. The new generation of politicians welcomes the increase of ultra nationalism, fascism, racism, xenophobia, anti-Islamism and anti-Turkism. Even mainstream politicians have begun to normalize this tendency and as such the animosity against Islam and Turkey is becoming widespread all over Europe. With these in mind, this new issue of *Insight Turkey* aims at providing a general framework regarding some of the most important issues that have a direct impact on the future of the EU including here German hegemony after Brexit, cyber security, EU relations with Turkey and the U.S. and the rise of the radical right. Simon Bulmer's commentary focuses on the sources of German hegemony within the EU after Brexit to later suggest two possible scenarios: namely the Franco-German partnership's revival or a form of German hegemony. Andr Barrinha in his commentary touches upon a very interesting topic that has gained a lot of importance lately: Cyber security has emerged as the focus of many western organizations, especially for the EU as they perceive Russia as a direct threat in cyberspace. In this context, Barrinha analyzes the response of the EU to the Russian threat and its effectiveness. Trump's arrival has created a lot of chaos in the world and we witness the decomposition of liberal values every day. In such an environment, U.S.-EU alliance is facing many difficulties and the cracks are becoming more visible. K. I. Bu. ra Kanat has presented a brief analysis on the transatlantic relations and contends that unpredictability is now considered the defining characteristic of the U.S. attitude toward Europe. Remaining within the context of the transatlantic relations, afak O. uz's article focuses on the missile defense system of NATO entitled the EPAA and argues that it is one of the key regional missile defense projects for the U.S. which claims to protect Europe from the Iranian ballistic missile threat but actually is designed to protect the American homeland and targets Russian Intercontinental Ballistic Missiles with nuclear warheads. The standoff in the Turkey-EU relations has been present for some years now. By focusing on the topic of the customs union, Ci. dem Nas and Serdar Altay present a brief analysis and suggestions for a possible new agreement between Turkey and the EU. In her commentary, i. dem Nas contends that the upgrade of the customs union could bring a breath of fresh air to Turkey-EU relations and reignite the process of Turkey's gradual integration into the EU. While arguing on the necessity of the upgrade of the customs union, Altay states that since membership is no longer an option, the sole contractual framework that will bind Turkey and the EU for the foreseeable future will be an upgraded customs union. As mentioned above, the rise of the far right constitutes a serious threat to European unity and as a result to the EU itself. In the light of this, Aristotle Kallis addresses the EU's policies toward the rising far right and argues that the EU needs to take into consideration the causes of citizen resentment without adopting the language and logic of the right-wing populists. The article of Sertan Akbaba provides a more detailed analysis of the now dominant discourses in Europe used by the leaders of the far right parties mainly in Netherlands, Finland, Italy and Hungary. The main targets of these populist discourses have been the Muslim people living in the European countries for this reason. In this issue, we bring to our readers two compelling perspectives. On the one hand, Pamela Irving Jackson and Pete Doerschler provide qualitative and quantitative evidence of

European identification by Muslims in France Austria and the Netherlands as a response to the far right political mobilization On the other hand Enes Bayraktar Farid Hafez and Leonard Faytze evaluate how the governments in Austria France and Germany have tried to assimilate the Muslims living in these states via specific laws and institutions According to them the underlying message of these policies is the fact that European states consider the Muslims a security threat to the state and society The weakening and defeat of ISIS will ironically have a negative impact on European security This is what Kyle Orton has argued in his article After providing a detailed analysis of the terrorist organization PKK and its offshoots Orton explains how the foreign fighters that fought in Syria against ISIS are now going back in their homelands mainly Europe becoming a serious threat to its security Hakan Samur in his article evaluates the stance of the Kurdish people living in Turkey towards Turkey's membership of the EU Based on the research field that the author has conducted Samur concludes by saying that while the Kurds are somewhat distrustful and skeptical toward the EU they continue to support EU membership The Balkans is one of the most important regions within Europe and it has a direct impact on European security economy and policies However for a long time people living in this region have fought each other In response to this Mirsad Krijetorac in optimistic tones argues that in order to move past the enmity that has characterized the Balkans it is necessary to display the region's religious and ethnic diversity as an inherent quality and a building block of cooperation and progress Lastly this issue of Insight Turkey brings an analysis of the June 24 elections in Turkey from the pen of Fahrettin Altun After approximately one year since the Turkish people approved the transition to the presidential system in the April 16 referendum in a consolidated majority Recep Tayyip Erdoğan became the first president of the new Turkey For those interested in Turkish politics Altun's commentary provides a general background to the new presidential system the electoral campaign of the parties that participated in the elections and the impact that the results of these elections will have on Turkish politics In conclusion internal and external threats have weakened the EU and its political discourse of pluralism and peaceful coexistence Furthermore continental and global conjunctures are also at work against the principles of the EU For this reason it is possible that one questions the effectiveness and future of the EU We are confident that this issue of Insight Turkey provides in depth information on important issues that are directly related to the EU and should be read carefully by anyone interested in the EU policies and its future

Crossing Borders: Constitutional Development and Internationalisation Florian Grotz, Th. A. J. Toonen, 2009-03-13 This book is dedicated to Joachim Jens Hesse a scholar whose multi faceted work may be characterised as an attempt at crossing borders in several respects These primarily include fostering interdisciplinary cooperation between law economics and social sciences analysing public sector developments in an international and intercultural perspective as well as bridging the gap between academia and practical politics Therefore the volume deals with a subject that covers these features in an exemplary manner the interrelationship between nation state constitutions and their international environments In this context ongoing processes of transnationalisation have not only

contributed to blurring the formerly clear cut boundaries between these two domains but also provoked a growing interest in and demand for comparative interdisciplinary and applied research on constitutional developments The authors of this Festschrift include eminent lawyers economists and political scientists from Europe the United States and East Asia who worked together with Joachim Jens Hesse in various contexts Black France / France Noire Trica Danielle Keaton, 2012-06-26 In Black France France Noire scholars activists and novelists address the paradox of race in France the state does not acknowledge race as a meaningful category but experiences of antiblack racism belie claims of color blindness

Saskia Hollander, 2019-04-02 This book demonstrates that the generally assumed dichotomy between referendums and representative democracy does not do justice to the great diversity of referendum types and of how referendums are used in European democracies Although in all referendums citizens vote directly on issues rather than letting their political representatives do this for them some referendums are more direct than others Rather than reflecting the direct power of the People most referendums in EU countries are held by and serve the interests of the political elites most notably the executive The book shows that these interests rarely match the justifications given in the public debate Instead of being driven by the need to compensate for the deficiency of political parties decision makers use referendums primarily to protect the position of their party In unravelling the strategic role played by national referendums in decision making this book makes an unconventional contribution to the debate on the impact of referendums on democracy Flags, Color, and the Legal Narrative Anne Wagner, Sarah Marusek, 2021-05-24 On behalf of Professor Hugh Brady Director and Senior Fellow The Flag Research Center at the University of Texas School of Law Flags Color and the Legal Narrative Public

Flags are mini texts on the inherent values and core concepts that a nation espouses and for this reason the colors that they bear can be read at many levels from the purely representational to the inherently cultural. Written by experts in various fields, this interdisciplinary anthology will be of interest to anyone in the humanities, social sciences, jurisprudence, narratology, political science and semiotics. It will show how a seemingly decorative aspect of nationhood, the colors on flags, tells a much deeper story about the human condition.

Comparative Grand Strategy. Thierry Balzacq, Peter Dombrowski, Simon Reich, 2019-05-28. This book develops a new approach in explaining how a nation's Grand Strategy is constituted; how to assess its merits and how grand strategies may be comparatively evaluated within a broader framework. The volume responds to three key problems common to both academia and policymaking. First, the literature on the concept of grand strategy generally focuses on the United States, offering no framework for comparative analysis. Indeed, many proponents of US grand strategy suggest that the concept can only be applied at most to a very few great powers such as China and Russia. Second, characteristically, it remains prescriptive rather than explanatory, ignoring the central conundrum of why differing countries respond in contrasting ways to similar pressures. Third, it often understates the significance of domestic politics and policymaking in the formulation of grand strategies, emphasizing mainly systemic pressures. This book addresses these problems. It seeks to analyze and explain grand strategies through the intersection of domestic and international politics in ten countries, grouped distinctively as great powers, the G5 regional powers, Brazil and India, and pivotal powers hostile to each other who are able to destabilize the global system: Iran, Israel, and Saudi Arabia. The book thus employs a comparative framework that describes and explains why and how domestic actors and mechanisms, coupled with external pressures, create specific national strategies. Overall, the book aims to fashion a valid cross-contextual framework for an emerging research program on grand strategic analysis.

Legacies of Enslavement in the French Republic. Nicola Frith, 2025-05-06. *Legacies of Enslavement in the French Republic* explores the complex dynamics between social movements invested in remembering and addressing the legacies of African enslavement and the French State. Exploring 25 years of activism from the build-up to the 150th anniversary of the Abolition Act 1998 through to the present day, the book investigates strategies used by the French State to delink the recognition of France's enslaving past from contemporary issues with anti-Black racism and reparation. Asks why, in the wake of the first Taubira law that recognized slavery as a crime against humanity in 2001, the state has legitimized the work of certain activist groups while delegitimizing others. Uses critical race theory and

decolonial theory to examine the extent to which the State's approach to recognizing its past is structured by a colonial matrix of power. Highlights and contests political and media misconceptions about reparations by showcasing the work of grassroots activists operating in France, the Caribbean, and the Indian Ocean. In doing so, *Legacies of Enslavement* showcases some of the key shifts that have taken place in the recent history of activist work operating in parallel with the successive metamorphoses of the French state as it responds to social and political pressure to recognize and repair the nation's enslaving past and its racial legacies today.
