Halal Logistics and Supply Chain Management in Southeast Asia Nor Aida Abdul Rahman, Azizul Hassan, Mohammad FakhrulNizam Mohammad, 2020-08-20.

The concept of Halal defines what adheres to Islamic law and is so comprehensive that it goes beyond food to include processes. The Halal industry has allowed many business firms a competitive advantage and is integral in its support for industries from food tourism banking and hospitality to medical. This book gives an overview of what Halal is in logistics and supply chain management and discusses related issues and challenges in Southeast Asia. The book also examines Halal logistics and supply chain in reference to global trends and practices. It attempts to integrate theoretical and methodological aspects of Halal logistics and supply chain study in different geographical areas across industries. This will be a useful reference for those who wish to understand the Halal ecosystem and Halal logistics supply chain development.

Technologies and Trends in the Halal Industry Nor Aida Abdul Rahman, Kamran Mahroof, Azizul Hassan, 2023-11-22
With recent technological developments touted also as Industry 4.0, numerous articles published over the years have emphasized the need to investigate the role of technology across all sectors including the halal industry. This book provides a greater understanding of the technologies, trends and debates associated with the halal industry from different sectors such as food logistics, pharmaceutical, tourism, medical, cosmetic and the retail sector. The book adds substantial discussion to the issues and trends of technology applications in the halal industry as well as the theories underpinning halal technology studies. It is in four sections: an overview of the halal industry, selected theories, technology and recent issues. The contributors explore how technology has evolved and been applied in industry and also look at how Industry 4.0 technologies like blockchain, Internet of Things (IoT), automation, machine learning and augmented reality are being integrated in the halal supply chain process. Written by well-regarded scholars and international academics from Africa, Europe, Middle East and Asia, this book provides expert contributions from research, regulatory and industry perspectives. This book will interest upper level students, scholars, academics and practitioners in the various disciplines of tourism and travel, hospitality, food studies, marketing, pharmaceutical and medical logistics management, Islamic studies and information technology in the halal industry.

Hand Book of Processed Functional Meat Products Sajad A. Rather, F. A. Masoodi, 2024-10-22
Functional food technology aims to boost consumer well-being by providing health benefits beyond that of fundamental nutrition. Meat and meat products have numerous disease preventing and health promoting benefits. However, the meat industry has faced many new challenges since the World Health Organization (WHO) studies suggesting that small increases in the risk of several cancers may be associated with high consumption of processed meat. In addition, consumers often associate meat with a negative health image. This negative image of meat is mainly due to fat content such as saturated fatty acids and cholesterol and process-induced toxicants like N-nitroso compounds and polycyclic aromatic hydrocarbons (PAHs) and the alliance of these with chronic diseases. In this context, the functional food concept applied to meat processing has gained importance, especially by reduction, replacement of fat, sodium nitrites, reduction of process-induced toxicants and addition of beneficial components such as probiotics and bioactive compounds. **Hand Book of Processed Functional Meat Products** provides meat

industry professionals with a step by step guide to post mortem muscle chemistry functional and cultured meat products design and development bioactive compounds reduction of carcinogenic compounds application of enzymes and nanotechnology innovation in sensory assessment authentication and marketing 3D printing in the development of meat based products and regulatory and consumer challenges in functional meat products This book differs from other publications on functional meat product processing in that it offers comprehensive coverage and in depth discussion of the most recent scientific and technological applications in functional meat products Many meat science and technology books available on the market describe meat chemistry properties and basic science with only a rudimentary understanding of meat processing functional meat products development and applications Therefore this work will be helpful for food industry professionals policy makers researchers students teachers and nutritionists and dieticians for a complete and up to date overview of functional meats processing and quality evaluation
