Manual Of Tropical Housing & Building Otto H Koenigsberger, O. H., Ingersoll, T. G., Mayhew, 1975 Designed As A Textbook For Students Of Architecture Housing Environmental Design And Climate Control In Tropical Countries This Book Deals With The Theory Of Climatic Design And Shows How Practical Solutions Are Derived From Theoretical Understanding Manual of Tropical Housing and Building Otto Heinrich Gustav Konigsberger, 1973 Manual of Tropical Housing Manual of Tropical Housing and Building Otto H. Koenigsberger, Thomas G. and Building Otto H. Koenigsberger, 1978 Ingersoll,1980 Manual of Tropical Housing and Building Otto H. Koenigsberger, 1974 **Manual of Tropical Housing and Building** O.H. Koenigshberger,2010 Climatic Design, Manual of Tropical Housing and Building, Part O.H. Koenigsberger,1980 Manual of tropical housing and building. [By] Otto H. Koenigsberger, T. G. Ingersoll, Alan Mayhew, S. V. Szokolay Otto H. Koenigsberger, 1974 Manual Of Tropical Housing & Building Otto H. Koenigsberger, 1984 **Tropical Toolbox** Jacopo Galli, 2022-03-24 Edwin Maxwell Fry and Jane Drew are two key figures of British architecture in the second half of the twentieth century their most important work was the book Tropical Architecture in the Dry and Humid Zones a manual compiled from the experience acquired in Ghana and Nigeria between 1949 and 1960 The manual is the formalisation of a design method specific for tropical areas the search for a renewed rooting of modern architecture not based on formal research or the revival of folkloric themes but on the close relationship between environmental support and anthropic intervention The design method has its roots in African colonial history and was the result of a long process of adaptation of Western modernist ideas to the extreme climatic conditions of the African continent A cosmopolitan localism based on the application of science in humanistic terms and capable of combining global and local dimensions was translated into an approach that respected the deep roots of tradition while providing innovation in terms of architectural solutions An Urban Approach To Climate Sensitive Design Rohinton Emmanuel, 2012-08-06 The need to respond to the rapidly changing city climate is particularly urgent in the tropics where the urban transition is currently at its peak While the need is clearly felt by the tropical urban dwellers texts that provide an overview of the problem and indicate possible design solutions are rare This comprehensive reference will be welcomed by student and practising architects as well as other built envronment professionals engaged with the environmental effects of building in worldwide warm and humid climates Design Principles of Atrium Buildings for the Tropics Mohd. Hamdan Ahmad, Mohamad Tajuddin Gandhi and Architecture Venugopal Maddipati, 2020-07-28 Gandhi and Architecture A Time Haji Mohamad Rasdi, 2000 for Low Cost Housing chronicles the emergence of a low cost low rise housing architecture that conforms to M K Gandhi s religious need to establish finite boundaries for everyday actions finitude in turn defines Gandhi s conservative and exclusionary conception of religion Drawing from rich archival and field materials the book begins with an exploration of Gandhi s religiosity of relinquishment and the British Spiritualist Madeline Slade s creation of his low cost hut Adi Niwas in

the village of Segaon in the 1930s Adi Niwas inaugurates a low cost housing architecture of finitude founded on the near simultaneous but heterogeneous conservative Gandhian ideals of pursuing self sacrifice and rendering the pursuit of self sacrifice legible as the practice of an exclusionary varnashramadharma At a considerable remove from Gandhi s religious conservatism successive generations in post colonial India have reimagined a secular necessity for this Gandhian low cost housing architecture of finitude In the early 1950s era of mass housing for post partition refugees from Pakistan the making of a low cost housing architecture was premised on the necessity of responding to economic concerns and to an emerging demographic mandate In the 1970s during the Organization of Petroleum Exporting Countries crisis it was premised on the rise of urban and climatological necessities More recently in the late 1990s and early 2000s its reception has been premised on the emergence of language based identitarianism in Wardha Maharashtra Each of these moments of necessity reveals the enduring present of a Gandhian low cost housing architecture of finitude and also the need to emancipate Gandhian finitude from Gandhi s own exclusions This volume is a critical intervention in the philosophy of architectural history Drawing eclectically from science and technology studies political science housing studies urban studies religious studies and anthropology this richly illustrated volume will be of great interest to students and researchers of architecture and design housing history sociology economics Gandhian studies urban studies and development studies Modernism's Magic Hat Ijlal Muzaffar, 2024-07-16 Examines the role of architecture in the history of global development and decolonization In Modernism's Magic Hat Ijlal Muzaffar examines how modern architects and planners help resolve one of the central dilemmas of the mid twentieth century world order how to make decolonization plausible without accounting for centuries of capital drain under colonial rule In the years after World War II architects and planners found extensive opportunities in new international institutions such as the World Bank the UN and the Ford Foundation and helped shape new models of global intervention that displaced the burden of change onto the inhabitants Muzaffar argues that architecture in this domain didn t just symbolically represent power but formed the material domain through which new modes of power acquired sense Looking at a series of architectural projects across the world from housing in Ghana to village planning in Nigeria and urban planning in Venezuela and Pakistan Muzaffar explores how architects and planners shaped new ideas of time land climate and the decolonizing body making them appear as sources of untapped value What resulted Muzaffar argues is a widespread belief in spontaneous Third World development without capital which continues to foreclose any global discussion of colonial Churches and Chapels Martin Purdy, 2014-05-15 Churches and Chapels A Design and Development Guide is a theft reference for structure approach to design development or alteration of a building The book deals with designing or altering traditional Western congregational halls and places of worship through a harmonious rending of religious worship and social action Part I of the book focuses on background presenting general ideas and influences that made today s churches Questions such as adapt or replace and concerns about design are addressed This part also examines the role of today s

clients and the possible types of churches and chapels that will prove desirable and satisfactory Part II discusses the design process covering the need for a feasibility study and agreed design development The feasibility study addresses retention of parts of the structure size of the structure costs and consideration of other building designs Design analysis involves evaluation of the architectural considerations that include Western congregational halls design ideas check ups and sketching The details of the scheme design contain precise information that will serve as basis for the client to modify or accept and for the authorities to approve Throughout this book case studies that are relevant for each topic are also given This guide is useful for administration of local parochial and district congregations. This book can likewise be appreciated by architects and structural engineers Sustainable Resilient Built Environments Rama Devi Nandineni, Susan Ang, Norwina Binti Mohd Nawawi, 2024-07-05 The proceedings of Sustainable Resilient Built Environments are based on the SRBE 2022 conference held in December 2022 It focuses on the advances under the overarching theme of Sustainability The concept of Sustainability has been conventionally defined as meeting the needs of the present without compromising the ability of future generations to meet their own needs In scientific literature sustainable development has been analysed using different qualitative approaches such as economic social ecological cultural institutional ethical and political In this edited volume the concepts of both sustainability and resilience are considered to open up useful pathways towards achieving sustainable buildings and infrastructure Though the concepts of sustainability and resilience are considered to help improve the built environment the interrelations and interdependence between these two concepts are not clearly evident This has led to the guestions such as Is the sustainable built environment always resilient Is the resilient built environment always sustainable What more is needed for sustainability In exploring these pertinent questions the proposed edited volume is expected to unveil and disseminate new insights on the themes related to sustainable and resilient built environment The themes of the proceedings lay a platform for researchers and professionals to integrate the aspects including smart innovation technologies green energy efficiency carbon reduction sustainability and resilience with regard to buildings and other built infrastructure Specific objectives included as per the five themes are as follows Environment Design and Sustainability Sustainable Smart Buildings Community Resilience Social Sustainability Heritage and Sustainability Pandemic issues and sustainable development **Stay Cool** Holger Koch-Nielsen, 2013-06-17 In hot dry or warm humid climates more than half of the urban peak load of energy consumption is used to satisfy air conditioning demands alone Since the urbanization rate in developing countries is extreme the pressure placed on energy resources to satisfy the future requirements of the built environment will be great unless new more cost effective measures can be introduced Stay Cool is an essential guide for planning and design using active design principles and passive means to satisfy human comfort requirements specifically in these climate zones based on examples of traditional and modern constructions The book demonstrates how a design strategy for urban environments and individual buildings incorporating naturally occurring

resources and specific energy efficient technologies can create a location form and structure that promote significant energy savings Such strategies can be applied to low cost housing or indeed to any other buildings in order to improve comfort with passive means and low energy budgets Following an outline of climatic issues characteristics and thermal comfort requirements the book details the available techniques and technologies that can be used to shape both built and external environments the building envelope material selections and natural ventilation and cooling methods to satisfy both human requirements and the need for energy efficiency It also includes an active design checklist and summary of available design checking tools a rehabilitation guide for existing urban building and external environments and solar charts Planners architects engineers technicians and building designers will find Stay Cool an inspirational guide and an essential reference when working with planning and design of the built environment in hot dry and warm humid climate zones It will also be of benefit to students academics and researchers with an interest in sustainable and energy efficient architecture techniques and practice **Introduction to Architectural Science** Steven V Szokolay, 2008-06-20 Introducing the basics of architectural science this book is an ideal reference providing an understanding of the physical basis of architectural design The knowledge gained from this book equips the reader with the tools to realize the full potential of the good intentions of sustainable bioclimatic design All sections have been revised and updated for this second edition including more information on small scale energy generation methods and techniques The book has also been reformatted to be even more accessible with a larger page size and colour printing The Housing and Construction Industry in Egypt Technology Adaptation Program (Cambridge, Mass.),1979 Climate Responsive Design Richard Hyde, 2013-10-08 Climate Responsive Design provides a unique source for students and practising architects requiring guidance on climatic design Covering theory and application it provides examples of innovative and best practice in responsive architecture through case studies The book also covers the broader topic of technology as a generator in design which will be of interest to all those involved in design and building The book focuses on tropical climate but some of the theory can be applied to other climates the difference in application is clearly delineated
