

Video equipment connections

- On each pair of input jacks, a red connector (marked R) corresponds to the right channel, and a white connector (marked L) to the left channel.
- A yellow connector (marked V) is used for video connection.
- Please refer to the instruction manual of each component when making any connections.

Notes:

- When using a playback-only VCR, connect it to VIDEO 2 or VIDEO 3. If you connect it to VIDEO 1, you need to make only the output connections.
- This receiver can be used with only a monitor TV equipped with a video input jack.
- Interference may be caused between the TV and this receiver. If this interference occurs, place the receiver and the TV as far apart as possible. We do not recommend the use of a common TV/VM antenna (see antenna section).
- A DVD or other component equipped with a digital output can be connected to this receiver. The digital connection must be used in conjunction with an analog connection, because if the analog cable is disconnected, the audio output from TAPE OUT (REC) and VIDEO 1 OUT will not work.
- A signal input from the S-video connector will be routed to the S-video out, and the signal input from the video connector will be routed to the video out.
- Refer to the instruction manual for the devices you wish to connect for information on whether you need to connect only the S-video connector, or both S-video connector and video connector.
- Remove the protective cap attached to the DIGITAL INPUT (OPTICAL) jack before making the connection. When this jack is not used, replace the protective cap.
