

Mealworm Experiment #2

Question:

Which foods do mealworms like to eat?
(potato slices, bran flakes, oats, apple slice)

**Hypothesis:**

I think mealworms will like _____ because _____

Materials:

- 20 mealworms
- 1 box
- potato slices
- bran flakes (Raisin Bran)
- oats (Cheerios)
- apple slices

**Procedure:**

- Step 1:** Place the four foods in each corner of the box. Use roughly the same amount of each food.
- Step 2:** Place your mealworms in the center of the box. Be sure they're on equal distance from each food.
- Step 3:** Observe the mealworms to see which food they prefer. Record your results.

Mealworm Investigation 3rd Grade

Robert R. Redfield

Mealworm Investigation 3rd Grade:

Standards-Based Science Investigations, Grade 3 Robert W. Smith, 2008-08-26 Through content area reading hands on experiences and inquiry investigations young scientists learn the essential concepts of science The language is clear simple and scientifically correct The imaginative and effective lessons cover life earth and physical sciences Helpful extras include science inquiry worksheets an inquiry assessment rubric and alignment to standards *Language and Literacy in Inquiry-Based Science Classrooms, Grades 3-8* Zhihui Fang, Linda L. Lamme, Rose M. Pringle, 2010-09-07 This hands on resource offers a wealth of strategies aligned with national science education standards including sample lessons for integrating reading instruction into inquiry based science classrooms *An Investigation of the Instructional Goals of the AAAS and ESS Elementary Science Programs as Perceived by the Classroom Teachers* Barbara Iris Kufsky, 1967

Hands-On Science and Technology for Ontario, Grade 2 Jennifer E. Lawson, 2020-08-25 Experienced educators share their best classroom tested ideas in this teacher friendly activity based resource The grade 2 book is divided into four units Growth and Changes in Animals Movement Properties of Liquids and Solids Air and Water in the Environment STAND OUT COMPONENTS custom written for the Ontario curriculum uses an inquiry based scientific and technological approach builds understanding of Indigenous knowledge and perspectives TIME SAVING COST EFFECTIVE FEATURES includes resources for both teachers and students a four part instructional process activate action consolidate and debrief enhance an emphasis on technology sustainability and personalized learning a fully developed assessment plan for assessment for as and of learning a focus on real life technological problem solving learning centres that focus on multiple intelligences and universal design for learning UDL land based learning activities and Makerspace centres access to digital image banks and digital reproducibles Find download instructions in the Appendix of the book **Resources for Teaching Elementary**

School Science National Science Resources Center of the National Academy of Sciences and the Smithsonian Institution, 1996-04-28 What activities might a teacher use to help children explore the life cycle of butterflies What does a science teacher need to conduct a leaf safari for students Where can children safely enjoy hands on experience with life in an estuary Selecting resources to teach elementary school science can be confusing and difficult but few decisions have greater impact on the effectiveness of science teaching Educators will find a wealth of information and expert guidance to meet this need in *Resources for Teaching Elementary School Science* A completely revised edition of the best selling resource guide *Science for Children Resources for Teachers* this new book is an annotated guide to hands on inquiry centered curriculum materials and sources of help in teaching science from kindergarten through sixth grade Companion volumes for middle and high school are planned The guide annotates about 350 curriculum packages describing the activities involved and what students learn Each annotation lists recommended grade levels accompanying materials and kits or suggested equipment and ordering information These 400 entries were reviewed by both educators and scientists to ensure that they are accurate

and current and offer students the opportunity to Ask questions and find their own answers Experiment productively Develop patience persistence and confidence in their own ability to solve real problems The entries in the curriculum section are grouped by scientific area Life Science Earth Science Physical Science and Multidisciplinary and Applied Science and by type core materials supplementary materials and science activity books Additionally a section of references for teachers provides annotated listings of books about science and teaching directories and guides to science trade books and magazines that will help teachers enhance their students science education Resources for Teaching Elementary School Science also lists by region and state about 600 science centers museums and zoos where teachers can take students for interactive science experiences Annotations highlight almost 300 facilities that make significant efforts to help teachers Another section describes more than 100 organizations from which teachers can obtain more resources And a section on publishers and suppliers give names and addresses of sources for materials The guide will be invaluable to teachers principals administrators teacher trainers science curriculum specialists and advocates of hands on science teaching and it will be of interest to parent teacher organizations and parents Hands-On Science and Technology, Grade 2 Jennifer

Lawson,2008-08-08 This teacher resource offers a detailed introduction to the Hands On Science and Technology program guiding principles implementation guidelines an overview of the science skills that grade 2 students use and develop and a classroom assessment plan complete with record keeping templates It also includes connections to the Achievement Levels as outlined in The Ontario Curriculum Grades 1 8 Science and Technology 2007 This resource has four instructional units Unit 1 Growth and Changes in Animals Unit 2 Movement Unit 3 Properties of Liquids and Solids Unit 4 Air and Water in the Environment Each unit is divided into lessons which focus on specific curricular expectations Each lesson has curriculum expectation s lists materials lists activity descriptions assessment suggestions activity sheet s and graphic organizer s

Inquire Within Douglas Llewellyn,2014 Your definitive guide to inquiry and argument based science updated for today s standards Like most teachers are you struggling to make sense of the many recent shifts in science education especially the NGSS Luckily Doug Llewellyn is here to guide you every step along the way His two big aims with this new edition of Inquire Within To help you engage students in activities and explorations that draw on their big questions then build students capacity to defend their claims Always striking a balance between the why and the how this third edition models what the new reform efforts looks like in day to day practice New features include how to Teach argumentation a key standards requirement and 21st century career skill Adapt existing science curricula for inquiry based learning to meet today s standards Effectively differentiate scientific instruction for multiple intelligences to drive student achievement Improve students language arts analytic and communication skills through inquiry based instruction Utilize the many inquiry based lesson plans Develop your own inquiry based mindset and grow professionally You ll quickly discover for yourself that this third edition of Inquire Within stands on its own as your single best resource for keeping pace with science reform in the

classroom Llewellyn's model of teaching and his rich array of practical examples can help every teacher and student to experiences that clearly illustrate what scientists and engineers do This is certainly a guide for the next generation of great teachers Juliana Texley President Elect National Science Teachers Association Llewellyn's Inquire Within provides strategies to support our efforts and infuse the components of the Next Generation Science Standards in our instruction through inquiry It should be at the elbow of every teacher interested in understanding inquiry and meeting the challenge Linda Froschauer Past President National Science Teachers Association

Teaching Science in Elementary and Middle School Joseph S. Krajcik, Charlene M. Czerniak, 2018-06-12 Teaching Science in Elementary and Middle School integrates principles of learning and motivation with practical teaching ideas for implementing them Paralleling what scientists do project based learning PBL represents the essence of inquiry and the nature of science and engages children and teachers in investigating meaningful real world questions about the world around them This text provides concrete strategies on teaching using a project based approach and on meeting the principles in A Framework for K 12 Science Education and the Next Generation Science Standards NGSS Features include strategies for planning long term interdisciplinary student centered units scenarios to help readers situate new experiences and a wealth of supplementary material on the Companion Website Features in the Fifth Edition Integrates research based findings from the National Research Council's Taking Science to School A Framework for K 12 Science Education and NGSS to engage learners and help them make sense of phenomena in using disciplinary core ideas science and engineering practices and crosscutting concepts Gives attention to cultural diversity throughout the chapters with an added focus on working with English Language Learners Describes how to develop and use assessments that require students to make use of their knowledge to solve problems or explain phenomena Illustrates how to use PBL to make connections to Common Core Standards for Mathematics and English Language Arts Provides examples of project based lessons and projects to illustrate how teachers can support children in engaging in scientific and engineering practices such as asking questions designing investigations constructing models and developing evidence based explanation *Research in Education*, 1971

Teaching Children Science: an Inquiry Approach Louis I. Kuslan, A. Harris Stone, 1968

Mathematics & Science in the Real World, 2000

Becoming Scientists Rusty Bresser, Sharon Fargason, 2023-10-10 Most important to being a good science teacher is holding the expectation that all students can be scientists and think critically Providing a thinking curriculum is especially important for those children in diverse classrooms who have been underserved by our educational system Becoming Scientists Good science starts with a question perhaps from the teacher at the start of a science unit or from the children as they wonder what makes a toy car move how food decomposes or why leaves change color Using inquiry science children discover answers to their questions in the same way that scientists do they design experiments make predictions observe and describe offer and test explanations and share their

conjectures with others In essence they construct their own understanding of how the world works through experimentation reflection and discussion Look into real classrooms where teachers practice inquiry science and engage students in the science and engineering practices outlined in the Next Generation Science Standards Rusty Bresser and Sharon Fargason show teachers how to do the following Build on students varied experiences background knowledge and readiness Respond to the needs of students with varying levels of English language proficiency Manage a diverse classroom during inquiry science exploration Facilitate science discussions Deepen their own science content knowledgeAs the authors state Inquiry science has little to do with textbooks and lectures and everything to do with our inherent need as a species to learn about and reflect on the world around us Join your students on a journey of discovery as you explore your world via inquiry
