Meeting the Challenges to Measurement in an Era of Accountability Henry Braun, 2016-01-29 Under pressure and support from the federal government states have increasingly turned to indicators based on student test scores to evaluate teachers and schools as well as students themselves The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests such as in mathematics or English language arts with a focus on grades 4 8 Teachers in these subject areas however constitute less than thirty percent of the teacher workforce in a district Comparatively little has been written about the measurement of achievement in the other grades and subjects This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all It addresses traditional end of course tests as well as alternative measures such as portfolios exhibitions and student learning objectives In each case

issues related to design and development psychometric considerations and validity challenges are covered from both a generic and a content specific perspective The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research based applications of educational measurement and assessment Edited by leading experts these books are comprehensive and practical resources on the latest developments in the field The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

International Teacher Judgement Practices

Val Klenowski, 2017-10-02 Human judgements underlie all assessments regarding the quality of students understandings and such judgements are conceptually complex and elusive The study of the complexity of the judgement process is in its infancy but clearly warrants further critical investigation However what is demonstrated from the wide variety of international teacher judgement practices presented in this volume is that teacher judgement requires a lot more than a set of standards criteria and annotated examples Understandings of assessment theory by pre service teachers through to more experienced teachers and opportunities for all to critically reflect and consider their judgements of student work are vital Teachers are struggling to maintain their interpretive freedom at the local professional level in contexts where central policies promote standardisation or regulation of judgement practice for accountability purposes This book was originally published as a special issue of Assessment in Education principles policy practice
