Manual of Hospital Planning and Designing Ajay Garg, Anil Dewan, 2022-01-29 This book is a one-stop resource on all the critical aspects of planning and designing hospitals, one of the most complex healthcare projects to undertake. A well-planned and designed hospital should control infection rate, provide safety to patients, caregivers, and visitors, help improve patients' recovery, and have scope for future expansion and change. Reinforcing these basic principles, guidance on such effective planning and designing is the key focus. Readers are offered insights into eliminating shortcomings at every stage of setting up a hospital, which may not be feasible to rectify later on through alterations. Chapters from 1 to 12 of the book provide exhaustive notes on initial planning, such as detailed project reports, feasibility studies, and area calculation. Chapters 13 to 27 include designing and layout of all the essential departments/units, such as OPD, emergency, intermediate care, diagnostics, operating rooms, and intensive care units. Chapters 28 to 37 cover designing support services like sterilization department, pharmacy, medical gas pipeline, kitchen, laundry, medical record, and mortuary. Chapters 38 to 48 take the readers through planning other services like air conditioning and ventilation, fire safety, extra-low voltage, mechanical, electrical, and plumbing services. Chapter 49 is for the planning of medical equipment. A particular chapter on Green hospital designing is included. This book is a single essential tabletop reference for hospital consultants, medical and hospital administrators, hospital designers, architecture students, and hospital promoters.

**Facilities Design** Sunderesh S. Heragu, 2008-06-19 Delineating the proper design layout and location of facilities, this book strikes a healthy balance between theory and practice. It provides an understanding of the practical aspects of implementing preliminary designs, development through analytical models. The third edition of a bestseller, it features updated multimedia tools, new software, and an Energy Research Abstracts, 1978

Monitoring Tools for Setting up The Hospital Project Ajay Garg, 2023-11-06 Compared to other commercial buildings, hospital buildings are one of the most complex building projects to plan, design, build, and operate. A well-planned set of all the activities involved in construction and setting up the hospital contributes a lot to reducing errors, avoiding modifications, completing a project on time, reducing the modification costs, decreasing or controlling infection rate, protecting patients and staff from injury, increasing patients' recovery rate, and increasing staff satisfaction. It is a fact that each hospital project department involves many individual departments, providing services, procurement of equipment, workforce recruitment, licensing, and establishing a set of Standard Operating Procedures (SOPs). Apart from this, it is necessary to start the particular activity well on time to make it a success in the scheduled period. If the start of the activity is delayed, it can delay the total project. It is

noticed that the site engineer makes a lot of mistakes while setting up the departments The reason for such mistakes can be like forgetting any particular activity not completing the activity on time etc In this book we have tried to address all such issues detailed all the activities in a tabular form and explained each activity in detail for the individual department of the hospital The table also contains the columns to plan the start and end date of the activity The table will also help assess the activity s progress and the person responsible for such activity The book has been written keeping in mind the timely completion of all the activities involved in setting up and furnishing the hospital s departments The book contains all such activities right from the initial setting up of the departments to the final inauguration of the hospital This book is helpful to the designers promoters site engineers architects and engineers in planning the activity its start and end linking it with other activities monitoring the activity etc well in advance As the book is in very easily understandable English language it may be a great help to students of Hospital Management Para Medical Sciences Architecture Site Engineers Site Supervisors Hospital Promoters Planners and Designers      **Catalog of Copyright Entries.
