1-888-933-2284 (WEE-CATH)

1. Wash hands with soap and water. Dry thoroughly.

2. Gently clean the tip of your penis with only alcohol soaked antiseptic wipe, utilizing a circular motion.

3. Open package by peeling blue layer away from white. Do not touch the catheter.

4. Remove CompactCath from packaging, holding the case by the rim.

5. While holding the case by the rim, use other hand to grip the advance shaft using a firm "pinch" technique with your thumb and index finger, making sure to take care of the catheter tip. Advance the catheter until it is flush beyond the advance shaft, or until both crystals are visible.

6. With one hand, securely hold penis in your palm while gripping advance shaft with your thumb and index finger.

7. Using the advance shaft as a steady hand, grip, slowly guide the catheter into your urethra. Do not allow the shaft to enter the urethra.

8. Firmly grip the advance shaft with your thumb & index finger while pulling the catheter case away from your body, ensuring 2" of the catheter.

9. Release pressure on the advance shaft when firmly pressing down on the advance handle. This will prevent the catheter from retracting into the case during advancement.

10. Push the case forward, allowing the catheter into the cavity. Repeat steps 8 & 9 until the catheter has reached the bladder.

11. You may feel some discomfort as the catheter reaches the bladder neck. A few deep breaths will help your muscles relax and loosen.

12. Once the catheter has reached the bladder and you are ready to void, push the catheter forward out and into it towards the toilet or collection device.

13. Once urine stops flowing and your bladder is empty, lock the device back into place. The self-inflating balloon case will prevent urine from dripping or spilling.

14. Gently remove the catheter from voiding, winding it back into the case in a clockwise direction.

15. Discard your catheter.
