Schizophrenia Bulletin ,2007 **Weird Tales** ,1924 **Photography, Natural History and the Nineteenth-Century Museum** Kathleen Davidson, 2017-12-02 The Victorian era heralded an age of

transformation in which momentous changes in the field of natural history coincided with the rise of new visual technologies. Concurrently different parts of the British Empire began to more actively claim their right to being acknowledged as indispensable contributors to knowledge and the progress of empire. This book addresses the complex relationship between natural history and photography from the 1850s to the 1880s in Britain and its colonies Australia, New Zealand and to a lesser extent India. Coinciding with the rise of the modern museum, photography's arrival was timely and it rapidly became an essential technology for recording and publicising rare objects and valuable collections. Also during this period the medium assumed a more significant role in the professional practices and reputations of naturalists than has been previously recognized and it figured increasingly within the expanding specialized networks that were central to the production and dissemination of new knowledge. In an interrogation that ranges from the first forays into museum photography and early attempts to document collecting expeditions to the importance of traditional and photographic portraiture for the recognition of scientific discoveries, this book not only recasts the parameters of what we actually identify as natural history photography in the Victorian era but also how we understand the very structure of empire in relation to this genre at that time.

Conservatism among the Iroquois at the Six Nations Reserve Annemarie Anrod Shimony, 1994-07-01. Annemarie Anrod Shimony's classic work clearly shows the contemporary cultural and religious crises that face the Longhouse Iroquois at the Six Nations Reserve, Ontario. Shimony presents a lucid and eloquent account of the survival of the Native American tradition which is struggling to maintain political and cultural autonomy in an ever-changing modern world. Based on original field work dating from 1953 to 1961 and supplemented by new material describing changes during the last thirty years, Shimony's work is once again the most comprehensive ethnography of the largest extant traditional Iroquoian community. Some of the material discussed includes the social organization, the system of hereditary chiefs, the beliefs and practices of the Longhouse religion, the events of the Iroquoian life cycle and the extensive medicinal and witchcraft aspects of the culture. Additional areas of focus include the rituals of the agricultural calendar and Iroquois conceptions of death and burial rituals. As Elizabeth Tooker wrote in *Indians of the Northeast*, Shimony's monograph is next to Morgan's *League* the most important general description of the Iroquois. With its new material added, *Conservatism among the Iroquois* is once again required reading for anyone interested in Native American culture.

Transformation Products of Emerging Contaminants in the Environment Dimitra A. Lambropoulou, Leo M. L. Nollet, 2014-02-05. Over the last 15 years the focus of chemical pollution has shifted from conventional pollutants to so-called emerging or new unregulated contaminants. These include pharmaceuticals and personal care products, hormones, UV filters, perfluorinated compounds, polybrominated flame retardants, BFRs, pesticides, plasticizers, artificial sweeteners, illicit drugs and endocrine disruptor compounds (EDCs). Despite the increasing number of published studies covering emerging contaminants, we know almost nothing about the effects of their transformation products and/or metabolites. This two-volume set provides a unique collection of research on

transformation products their occurrence fate and risks in the environment It contains 32 chapters organised into 7 parts each with a distinct focus General Considerations Transformation Processes and Treatment Strategies Analytical Strategies Occurrence Fate and Effects in the Environment Global Speciality and Environmental Status Risk Assessment Management and Regulatory Framework Outlook Transformation Products of Emerging Contaminants in the Environment is a valuable resource for researchers and industry professionals in environmental chemistry analytical chemistry ecotoxicology environmental sciences and hydrology as well as environmental consultants and regulatory bodies
