Foundations of Airline Finance Bijan Vasigh, Ken Fleming, Liam Mackay, 2010 *Foundations of Airline Finance Methodology and Practice* is a textbook that comprehensively covers at a basic level all aspects of the subject bringing together many of the numerous and informative articles and institutional developments that have characterized the field of airline finance in the previous two decades. The book is of greatest value to students who are contemplating entering financial management in the air transportation industry; however, the text also serves as an accessible and comprehensive reference for industry professionals. *Foundations of Airline Finance* Bijan Vasigh, 2014-11-13 In recent years the airline industry has experienced severe volatility in earnings with airlines recording periods of substantial profits that are closely followed by periods of financial distress. This trend has continued into the new millennium with numerous examples of airlines across the globe entering bankruptcy protection or liquidating. The text provides an introduction to both the basics of finance and the particular intricacies of airline finance where there can be significant fluctuations in both revenues and costs. This new edition also includes capital budgeting, management of current assets, financial risk analysis, fuel hedging, aircraft leasing. This textbook contains chapters that cover unique aspects of the aviation financial decision making process. These include a rigorous and structured presentation of the buy versus lease decision that is prevalent in the industry, a valuation process for aviation assets, the recent trend toward privatization, and the difficulty inherent in the valuation of a publicly owned or semi publicly owned asset. The *Foundations of Airline Finance* now in its second edition is an introductory text that can be used either as a general financial text or in a specialized class that deals with aviation finance in particular.
