Fp7 Guide For Applicants Collaborative Projects:

The Impact of Participation in Publicly Funded R&D Projects on Firm Competitiveness: Benefits and Barriers to the Use of National and EU Funding Programmes on the Example of Swiss SMEs in the Field of Renewable Energy Manuel Kaar, Jeanette Müller, 2011-03-30 Inhaltsangabe

Introduction Never before in history has global demand for energy been stronger than today While exhaustible resources such as oil gas and coal are expected to remain the world's primary basis of energy generation in the near future alternative resources like biomass solar or wind energy are predicted to grow significantly in importance e.g. International Energy Agency 2009 The strong global energy demand together with rising costs of finding and exploiting fossil fuels has contributed to a considerable increase in public awareness for the energy supply issue in recent years and thus also to an acceleration of the investments and developments in the field of alternative resources Yet in order to achieve a fundamental shift away from exhaustible resources on a long term basis creative innovations and new technology solutions for renewable energy production are vital The basis for the successful development and commercialisation of such new technologies is effective research and development R D work by companies universities and other organisations Small and medium sized enterprises SMEs take on a special role in this respect The majority of European companies are SMEs if measured by the EU criteria EC DG Research Communication Unit 2010a p 6 that is they have less than 250 employees and an annual turnover and or balance sheet total lower than EUR 50 million and or EUR 43 million respectively The large number of SMEs in Europe implies that there is a high diversity and thus also a vast potential for innovation in these organisations Nevertheless in most countries including Switzerland the bulk of research in the private sector is undertaken by larger businesses In Switzerland R D by SMEs SFSO definition i.e. firms with less than 100 employees accounted for only 16% of total in house R D spending in 2008 although some 99% of Swiss companies are categorised as SMEs SFSO 2010 p 9 In addition many smaller companies do not engage in R D at all as they simply do not possess the necessary resources These facts lead to a situation where much potential for innovation in smaller firms remains unused Providing SMEs with the opportunity to engage in publicly funded R D projects offers one way to tap into this potential for innovation that would otherwise continue to lie idle and is therefore highly reasonable from a policy point of view At the same time participation in such projects

Smart Intelligent Aircraft Structures (SARISTU) Piet Christof Wölcken, Michael Papadopoulos, 2015-09-04 The book includes the research papers presented in the final conference of the EU funded SARISTU Smart Intelligent Aircraft Structures project held at Moscow Russia between 19-21 of May 2015 The SARISTU project which was launched in September 2011 developed and tested a variety of individual applications as well as their combinations With a strong focus on actual physical integration and subsequent material and structural testing SARISTU has been responsible for important progress on the route to industrialization of structure integrated functionalities such as Conformal Morphing Structural Health Monitoring and Nanocomposites The gap and edge free deformation of aerodynamic

surfaces known as conformal morphing has gained previously unrealized capabilities such as inherent de icing erosion protection and lightning strike protection while at the same time the technological risk has been greatly reduced Individual structural health monitoring techniques can now be applied at the part manufacturing level rather than via extending an aircraft s time in the final assembly line And nanocomposites no longer lose their improved properties when trying to upscale from neat resin testing to full laminate testing at element level As such this book familiarizes the reader with the most significant developments achievements and key technological steps which have been made possible through the four year long cooperation of 64 leading entities from 16 different countries with the financial support of the European Commission

A way to Brussels or How to win a European project in humanities Oto Luthar, Lucija Mulej, Martin Pogaèar, 2008-01-01 **Research Methodology in the Medical and Biological Sciences** Petter Laake, Haakon Breien Benestad, Bjorn R. Olsen, 2007-11-05 Providing easy to access information this unique sourcebook covers the wide range of topics that a researcher must be familiar with in order to become a successful experimental scientist Perfect for aspiring as well as practicing professionals in the medical and biological sciences it discusses a broad range of topics that are common yet not traditionally considered part of formal curricula The information presented also facilitates communication across conventional disciplinary boundaries in line with the increasingly multidisciplinary nature of modern research projects Perfect for students with various professional backgrounds providing a broad scientific perspective Easily accessible concise material makes learning about diverse methods achievable in today s fast paced world *Gaining Funding For Research* Berry, Dianne, 2010-07-01 Success at seeking and gaining funding is now a vital component of building of a successful research career The book sets out the case for why success at winning funding is so important from both an institutional and individual researcher perspective **Nature** Sir Norman Lockyer, 2008 **European Space Agency and Programs Handbook: Strategic Information and Contacts** IBP, Inc., 2009-03-20 European Space Agency ESA Handbook

Stocktaking 10 Years of "Women in Science" Policy by the European Commission 1999-2009 European Commission. Directorate General for Research, 2010 Ten years ago the European Commission started its activities on women in science This Report records this ten year history analyses the activities undertaken provides an assessment of their effectiveness and appropriateness and whenever possible includes a reflection on what did not work what was not done and how these omissions could be addressed The authors believe that this report a stocktaking of 10 years of activities on women in science Will help the European Commission to make decisions on future policy because of the perspective provided by the process of taking stock And this report should also help future proposal presenters providing them with the background to the topic and the details of previously funded projects thereby placing the Framework Programme calls into a policy development context Editor *Professionalism in the Information and Communication Technology Industry* John Weckert, Richard Lucas, 2013-10-15 Professionalism is arguably more important in some occupations than in others It is vital

in some because of the life and death decisions that must be made for example in medicine In others the rapidly changing nature of the occupation makes efficient regulation difficult and so the professional behaviour of the practitioners is central to the good functioning of that occupation The core idea behind this book is that Information and Communication Technology ICT is changing so quickly that professional behaviour of its practitioners is vital because regulation will always lag behind
