**Report** South Africa. Department of Basic Education, 2016 **Communication in Accounting Education** Richard M.S. Wilson, F. Elizabeth Gray, Lynn Hamilton, 2016-04-14 Accounting often described as the language of business requires a diverse set of written listening and oral communication skills if those who practise it are to be effective Given the pace of change relating to for example the evolution of international accounting standards and the demands for greater transparency accountants must be clear responsive and audience focussed communicators Employers of accountants consistently comment on the need for their new graduate recruits and trainees to have strong written oral and interpersonal communication skills In this light accounting educators face the challenge of designing and delivering programmes that reflect professional expectations on the part of employers and clients and educating students on how to make informed communication choices in order to achieve desired results and to build good working relationships The chapters in this book deal with such topics as accounting students perceptions of oral communication skills competence based writing skills and the development of listening skills This book was originally published as Accounting Education an international journal **Collaborative**

**Explorations of Character Experience** Don K. Philpot, 2022-03-15 Many middle grade novels published in the past 50 years

focus on the personal experiences of a prominent fictional world individual age 10-14. This singular focus on one adolescent character which is sustained for the full length of the novel is most common in contemporary realistic or period novels. To explore the personal experiences of a prominent fictional young person with middle grade students, teachers will select novels whose exclusive focus is the lived experiences of one fictional world individual age 10-14 and guide students' efforts to develop full and enlightened understandings about these individuals. Collaborative Explorations of Character Experience. Reading Actively in Middle Grade Language Arts draws on the personal experiences of eight fictional young people in an effort to answer three key questions: What can middle grade students learn about a prominent adolescent character in a middle grade novel by focusing on the personal experiences of that individual? In what ways do middle grade students benefit from reading assigned novels with a sustained focus on character experience and the personal experiences of a fictional young person? How can middle grade language arts teachers help their students to read assigned novels with a sustained focus on character experience?

*Recent Advances of Epigenetics in Crop Biotechnology* Clelia De-la-Peña, Raúl Alvarez-Venegas, Christopher Cullis, 2016-05-31. Epigenetics is a new field that explains gene expression at the chromatin structure and organization level. Three principal epigenetic mechanisms are known and hundreds of combinations among them can develop different phenotypic characteristics. DNA methylation, histone modifications, and small RNAs have been identified and their functions are being studied in order to understand the mechanisms of interaction and regulation among the different biological processes in plants. Although fundamental epigenetic mechanisms in crop plants are beginning to be elucidated, the comprehension of the different epigenetic mechanisms by which plant gene regulation and phenotype are modified is a major topic to develop in the near future in order to increase crop productivity. Thus, the importance of epigenetics in improving crop productivity is undoubtedly growing. Current research on epigenetics suggests that DNA methylation, histone modifications, and small RNAs are involved in almost every aspect of plant life, including agronomically important traits such as flowering time, fruit development, responses to environmental factors, defense response, and plant growth. The aim of this Research Topic is to explore the recent advances concerning the role of epigenetics in crop biotechnology as well as to enhance and promote interactions among high quality researchers from different disciplines such as genetics, cell biology, pathology, microbiology, and evolutionary biology in order to join forces and decipher the epigenetic mechanisms in crop productivity.

*Resources in Education*, 2000-04. *Archives of Pathology & Laboratory Medicine*, 1999. **The First Viral Images** Stephanie Porras, 2022-10-25. As a social phenomenon and a commonplace of internet culture, virality provides a critical vocabulary for addressing questions raised by the global mobility and reproduction of early modern artworks. This book uses the concept of virality to study artworks' role in the uneven processes of early modern globalization. Drawing from archival research in Asia, Europe, and the Americas, Stephanie Porras traces the trajectories of two interrelated objects made in Antwerp in the late sixteenth century: Gerónimo Nadal's *Evangelicae historiae imagines* and

illustrated devotional text published and promoted by the Society of Jesus and a singular composition by Maerten de Vos St Michael the Archangel Both were reproduced and adapted across the early modern world in the seventeenth century Porras examines how and why these objects traveled and were adopted as models by Spanish and Latin American painters Chinese printmakers Mughal miniaturists and Filipino ivory carvers Reassessing the creative labor underpinning the production of a diverse array of copies citations and reproductions Porras uses virality to elucidate the interstices of the agency of individual artists or patrons powerful gatekeepers and social networks and economic political and religious infrastructures In doing so she tests and contests several analytical models that have dominated art historical scholarship of the global early modern period putting pressure on notions of copying agency context and viewership Vital and engaging The First Viral Images sheds new light on how artworks as agents of globalization navigated and contributed to the emerging and intertwined global infrastructures of Catholicism commerce and colonialism
