Advances in Educational Technologies and Instructional Design series collection **Academic Language in Diverse Classrooms: Definitions and Contexts** Margo Gottlieb, Gisela Ernst-Slavit, 2014-04-14 Ensure your school speaks the language of success Since the introduction of the Common Core schools realize the necessity for a deep understanding of academic language as a stepping stone to academic achievement The expectations for more robust curriculum instruction and assessment require administrators teachers and students to retool for academic success This companion volume to Margo Gottlieb and Gisela Ernst Slavit s six book series on academic language provides a thorough overview of key concepts and effective practices Optimized for curricular planning and in classroom reference with particular attention to linguistically and culturally diverse students the book includes Definitions and examples of the dimensions of academic language A step by step template for teachers to incorporate academic language into their planning for student learning Graphic models that illustrate academic language use across the content areas **Building the Foundation: Whole Numbers in the Primary Grades** Maria G. Bartolini Bussi, Xu Hua Sun, 2018-03-29 This twenty third ICMI Study addresses for the first time mathematics teaching and learning in the primary school and pre school setting while also taking international perspectives socio cultural diversity and institutional constraints into account One of the main challenges of designing the first ICMI primary school study of this kind is the complex nature of mathematics at the early level Accordingly a focus area that is central to the discussion was chosen together with a number of related questions The broad area of Whole Number Arithmetic WNA including operations and relations and arithmetic word problems forms the core content of all primary mathematics curricula The study of this core content area is often regarded as foundational for later mathematics learning However the principles and main goals of instruction on the foundational concepts and skills in WNA are far from universally agreed upon and practice varies substantially from country to country As such this study presents a meta level analysis and synthesis of what is currently known about WNA providing a useful base from which to gauge gaps and shortcomings as well as an opportunity to learn from the practices of different countries and contexts **Transparency in Assessment - Exploring the Influence of Explicit Assessment Criteria** Anders Jönsson, Frans Prins, 2019-04-03 In many schools and higher education institutions it has become common practice to share assessment criteria with students Sometimes it is required for accountability purposes at other times criteria are used as a means to communicate expectations to students However the idea that explicit assessment criteria should be shared with students has been contested On the one hand research has shown that explicit criteria may positively affect student performance reduce their anxiety as well as support students use of self regulated learning strategies On the other hand there are fears that explicit criteria may have a restraining influence on students learning as well as limiting their autonomy and creativity There are also indications of students becoming more performance oriented as opposed to learning oriented when being provided with explicit assessment criteria Taken together it is not fully understood under which circumstances it is productive for student learning to share

explicit assessment criteria and under which circumstances it is not. In particular empirical research on the proposed negative effects of sharing criteria with learners is limited and most fears voiced in the literature are based on individual experiences and anecdotal evidence. In this book we therefore bring different perspectives on transparency in assessment together in order to further our understanding of how students are influenced by the use of explicit assessment criteria. A deeper understanding of the influence of explicit assessment criteria on students' understanding of criteria, motivation and learning is equally imperative for future research and educational practice, both of which need to go beyond individual opinions and convictions.

With an extensive array of chapters on topics ranging from non-traditional students to online and distance education for adult learners, this multi-volume reference book will provide students, educators and industry professionals with the tools necessary to make the most of their return to the classroom.

The Concerns Based Adoption Model (CBAM) Gene E. Hall, 2025-04-01. Change can be interesting, challenging, easy, difficult and sometimes fun. *The Concerns Based Adoption Model (CBAM): Constructs, Evidence, Applications and Implications for Facilitating Change* edited by Gene E. Hall, a key originator of CBAM, uses a research-tested model to introduce students in education to ways of thinking, strategies and steps that leaders can take to facilitate and advance change processes in their own schools. The primary focus of this book and method is on understanding the thoughts, perceptions, feelings and concerns of the people who are engaged with change and finding systematic ways to address them. This edited volume provides clear instruction from researchers who know CBAM best, experiences and case studies from a wide variety of educational settings and strong pedagogy so readers can learn CBAM and apply this model to their educational systems.
