The Making of Twenty-First-Century Richmond Thad Williamson, Julian M. Hayter, Amy L. Howard, 2024-12-02 Richmond Virginia took center stage globally in the summer of 2020 as an epicenter of antiracist protests in the wake of the police murder of George Floyd In a period of just a few weeks overwhelming public support grew for removing Richmond s Confederate monuments Activists then transformed the remaining statue of Robert E Lee into a shrine to African American resolve to the Black Lives Matter movement and to Black victims of police brutality Coming to terms with Richmond s tortured racial history however is much more difficult than toppling symbols of white supremacy This book explores these dynamics via a multidisciplinary framework of historical research public policy analysis and political analysis showing the inner dynamics of politics and governance in Richmond The authors reveal why change and progress has often been so difficult to achieve and why that matters with a focus on three fundamental policy areas education economic development and housing The result is a comprehensive assessment of urban governance in a major southern city in the early twenty first century as well as an accounting of the policy and human consequences of both its limited successes and its recurring failures

The New Localism Bruce Katz, Jeremy Nowak, 2018-01-09 The New Localism provides a roadmap for change that starts in the communities where most people live and work In their new book The New Localism urban experts Bruce Katz and Jeremy Nowak reveal where the real power to

create change lies and how it can be used to address our most serious social economic and environmental challenges Power is shifting in the world downward from national governments and states to cities and metropolitan communities horizontally from the public sector to networks of public private and civic actors and globally along circuits of capital trade and innovation This new locus of power this new localism is emerging by necessity to solve the grand challenges characteristic of modern societies economic competitiveness social inclusion and opportunity a renewed public life the challenge of diversity and the imperative of environmental sustainability Where rising populism on the right and the left exploits the grievances of those left behind in the global economy new localism has developed as a mechanism to address them head on New localism is not a replacement for the vital roles federal governments play it is the ideal complement to an effective federal government and currently an urgently needed remedy for national dysfunction In *The New Localism* Katz and Nowak tell the stories of the cities that are on the vanguard of problem solving Pittsburgh is catalyzing inclusive growth by inventing and deploying new industries and technologies Indianapolis is governing its city and metropolis through a network of public private and civic leaders Copenhagen is using publicly owned assets like their waterfront to spur large scale redevelopment and finance infrastructure from land sales Out of these stories emerge new norms of growth governance and finance and a path toward a more prosperous sustainable and inclusive society Katz and Nowak imagine a world in which urban institutions finance the future through smart investments in innovation infrastructure and children and urban intermediaries take solutions created in one city and adapt and tailor them to other cities with speed and precision As Katz and Nowak show us in *The New Localism* Power now belongs to the problem solvers

Breaking the STEM Stereotype Amanda Alzena Sullivan, 2019-10-21

Men continue to outnumber women in numerous technical STEM Science Technology Engineering and Math fields such as engineering and computer science Prior work demonstrates the importance of introducing girls to STEM content early on before gender stereotypes are ingrained However many parents and teachers are not sure how to do this in a developmentally appropriate and playful way *Breaking the STEM Stereotype Reaching Girls in Childhood* by Dr Amanda Sullivan Ph D explores the various social cultural and psychological reasons behind the persistent gender disparity between men and women in STEM fields By explaining the powerful role of stereotypes the media and experiences with peers and adults during the foundational early childhood years this book builds the case of early childhood being a critical time in development to reach girls *Breaking the STEM Stereotype* is set up in three parts Part 1 provides the current state of the gender divide in each aspect of STEM and explores why early childhood is a critical time to address this divide Part 2 explores gender identity development and gender stereotypes as well as the influences of the media advertising and adult and peer role models on young children Finally Part 3 arms readers with the knowledge they need to dispel gender stereotypes in STEM It provides suggestions on tools technologies and kits that can be used with young girls beginning in pre kindergarten It provides materials needed to design effective curricula and activities to engage girls with STEM in playful

ways that build on their personal interests Assessing Writing to Support Learning Sandra Murphy, Peggy O'Neill, 2022-11-08 In this book authors Murphy and O'Neill propose a new way forward moving away from high stakes test based writing assessment and the curriculum it generates and toward an approach to assessment that centers on student learning and success Reviewing the landscape of writing assessment and existing research based theories on writing the authors demonstrate how a test based approach to accountability and current practices have undermined effective teaching and learning of writing This book bridges the gap between real world writing that takes place in schools college and careers and the writing that students are asked to do in standardized writing assessments to offer a new ecological approach to writing assessment Murphy and O'Neill's new way forward turns accountability inside out to help teachers understand the role of formative assessments and assessment as inquiry It also brings the outside in by bridging the gap between authentic writing and writing assessment Through these two strands readers learn how assessment systems can be restructured to become better aligned with contemporary understandings of writing and with best practices in teaching With examples of assessments from elementary school through college chapters include guidance on designing assessments to address multiple kinds of writing integrate reading with writing and incorporate digital technology and multimodality Emphasizing the central role that teachers play in systemic reform the authors offer sample assessments developed with intensive teacher involvement that support learning and provide information for the evaluation of programs and schools This book is an essential resource for graduate students instructors scholars and policymakers in writing assessment composition and English education Planning & Changing, 2017 *Federal Register*, 2013-08 *The Complete Book of Colleges*, 2018 Edition Princeton Review, 2017-07 Includes information on admissions cost financial aid required and recommended admissions criteria cost breakdowns and types of financial aid for 1 355 colleges and universities Abstraction and Representation Peter Damerow, 2013-06-29 The author of this book is affiliated with the Center for Development and Socialization of the Max Planck Institute for Human Development and Education in Berlin and heads its program on culture and cognition which devotes its labors to the reconstruction of scientific concepts through history in a perspective of what might be called historical epistemology He is also a member of a related research group in the newly founded Max Planck Institute for the History of Science in Berlin Perhaps this double affiliation throws some light on the scope of Damerow's scientific interests In any event it will explain why representatives of both these institutions join in an effort to introduce Peter Damerow's writings to an English speaking audience Damerow's scholarship ranges across widely different areas including philosophy and history of science psychology and education Among his fields of expertise are the emergence of writing early Babylonian mathematics the history of arithmetic the relationship between pure and applied mathematics the theory and methods of mathematics instruction the transition from preclassical to classical mechanics and the history and theory of relativity *The Plot to Change America* Mike Gonzalez, 2022-06-14 The Plot to Change America exposes the

myths that help identity politics perpetuate itself This book reveals what has really happened explains why it is urgent to change course and offers a strategy to do so Though we should not fool ourselves into thinking that it will be easy to eliminate identity politics we should not overthink it either Identity politics relies on the creation of groups and then on giving people incentives to adhere to them If we eliminate group making and the enticements we can get rid of identity politics The first myth that this book exposes is that identity politics is a grassroots movement when from the beginning it has been and continues to be an elite project For too long we have lived with the fairy tale that America has organically grown into a nation gripped by victimhood and identitarian division that it is all the result of legitimate demands by minorities for recognition or restitutions for past wrongs The second myth is that identity politics is a response to the demographic change this country has undergone since immigration laws were radically changed in 1965 Another myth we are told is that to fight these changes is as depraved as it is futile since by 2040 America will be a minority majority country anyway This book helps to explain that none of these things are necessarily true
