Human Impact on Ancient Environments Charles L. Redman, 1999-10 Threats to biodiversity food shortages urban sprawl lessons for environmental problems that confront us today may well be found in the past The archaeological record

contains hundreds of situations in which societies developed long term sustainable relationships with their environments and thousands in which the relationships were destructive Charles Redman demonstrates that much can be learned from an improved understanding of peoples who through seemingly rational decisions degraded their environments and threatened their own survival By discussing archaeological case studies from around the world from the deforestation of the Mayan lowlands to soil erosion in ancient Greece to the almost total depletion of resources on Easter Island Redman reveals the long range coevolution of culture and environment and clearly shows the impact that ancient peoples had on their world These case studies focus on four themes habitat transformation and animal extinctions agricultural practices urban growth and the forces that accompany complex society They show that humankind s commitment to agriculture has had cultural consequences that have conditioned our perception of the environment and reveal that societies before European contact did not necessarily live the utopian existences that have been popularly supposed Whereas most books on this topic tend to treat human societies as mere reactors to environmental stimuli Redman s volume shows them to be active participants in complex and evolving ecological relationships Human Impact on Ancient Environments demonstrates how archaeological research can provide unique insights into the nature of human stewardship of the Earth and can permanently alter the way we think about humans and the environment

environmental scientist Liam Heneghan explores the intricate relationships between humanity and Earth in an accessible and engaging style. Replete with real world examples and drawing from classic and contemporary scholarship, the author adapts the fundamental conceptual models of the environmental disciplines to assess the risks human beings are taking with their home planet. The conceptual approach of this primer challenges readers to think across multiple disciplines to reveal the big picture that is all too often lost in the details of contemporary environmental studies. Readers will also find a thorough introduction to conceptual modeling showing how systems models can be adapted and applied in a rapidly changing world. Comprehensive explorations of the human impact on the Earth including an examination of possible ecological limits and planetary boundaries. In depth evaluations of environmental risks especially though not limited to climate change and biodiversity loss. A guide to contemplating catastrophic risk and the potential for societal collapse without inducing unnecessary anxiety. An interdisciplinary focus emphasizing the role of the natural and social sciences as well as the arts and humanistic disciplines in safeguarding the future. Perfect for students of environmental science and environmental studies. A Primer on Human Impacts on the Environment will also earn a place in the libraries of graduate students working on environmental themes and practicing professionals in the environmental management community.

Expert's Advice, Prelims & Mains Pointers* | Divya Mishra, The primary goal of this book is to enable effective updated and easy preparation for UPSC and State PSC exams. Both the structure and content of the book have been carefully designed to serve the triple purposes of self study, revision and expert guidance to the aspirant. Each chapter begins with Learning Outcomes, Chapter Analysis and Issues to Ponder to introduce the topics covered, develop curiosity and capture student's interest. The book is filled with infographics at relevant places which is helpful to learn answer writing presentations of Mains exam writing. The infographics or images are such that they can be memorized and elaborated in words for answer making. Further, this is a Text Guide in the sense that it combines the theoretical knowledge of a textbook with the practical strategic aspects of a Guide. This Text Guide aims to solve all content and guidance related problems of a student at once. It is powered with a section called Expert's Advice where the author directly addresses guides and instructs the student using his expert knowledge. This will help the student to understand which sections are most important, what can be asked in future and what should not be skipped strictly from exam point of view. In terms of the content, the differences between Ecology and Environment and between Environmental Studies and Environmental Sciences have been clearly maintained throughout the book. The writing style is lucid, concise and cross-referential. Sections from all chapters are linked with questions that previously appeared in Prelims and Mains, thus helping you keep the big picture in mind. Prelims Confusing Terms, Simplified Prelims Pointers, Mains Pointers, Think Tank and In short are mentioned throughout the book wherever necessary. A separate Chapter with short revision notes encompassing the crux of the whole book by the name of SNAPSHOT is provided at the end of the Book. This book is a comprehensive text guide with exhaustive discussion in 45 Chapters. The theory is enriched with Previous year Prelims Questions, NCERT based MCQs and Mains related questions and answers. There is detailed emphasis on concepts and anecdotes through factsheets in all the chapters.

Reaching for the Sun John King, 2011-01-06 From their ability to use energy from sunlight to make their own food to combating attacks from diseases and predators, plants have evolved an amazing range of life sustaining strategies. Written with the non-specialist in mind, John King's lively natural history explains how plants function from how they gain energy and nutrition to how they grow, develop and ultimately die. New to this edition is a section devoted to plants and the environment exploring how problems created by human activities such as global warming, pollution of land, water and air and increasing ocean acidity are impacting on the lives of plants. King's narrative provides a simple, highly readable introduction with boxes in each chapter offering additional or more advanced material for readers seeking more detail. He concludes that despite the challenges posed by growing environmental perils, plants will
