The menstrual flow results due to breakdown of endometrial lining of the uterus and its blood vessels which forms liquid that comes out through vagina. Menstruation only occurs if the released ovum is not fertilised. Lack of menstruation may be indicative of pregnancy. The Patchwork Human Peter Luykx, 2022-05-25. Life began about four billion years ago on our planet. Like an old patchwork quilt, evolution stitched the human being together from parts of ancient species now long extinct. Like any species, humans have hundreds or even thousands of traits that have been passed down through time. The evolutionary age of our different traits can be told from how widely distributed they are among today's living creatures. The book aims to explain some human traits and how we, as social, sexual, language-obsessed, technological apes, evolved into our own modern species. Combining hard science with philosophical thought, this work aims to explain where humans have come from and where we are going. Free of complicated jargon, it breaks down the concept of evolution starting with the human body's most basic component: our cells. Building from there, chapters explore which traits became inherited over evolutionary time, ultimately projecting what could be next for our species.
