

A BILLION DOLLAR

more. It's a multi-billion dollar industry. Any shark is taken regardless of age, size, or species.

## MILLIONS OF ENCOUNTERS PER YEAR...

Each year around the world there are about 70 confirmed shark attacks, only 3 of which on average result in death. The numbers of attacks have risen over the past several decades, but not because sharks are more aggressive. Humans have simply taken to coastal waters in increasing numbers.

## ANNUAL HUMAN DEATHS RESULTING FROM:

• Sharks	3
• Elephants/ Tigers	200
• Execution	2,400
• Illegal Drugs	22,000
• Road Accidents	1,200,000
• Starvation	8,000,000

## "MAN EATER" IS A MISNOMER...

Sharks are known as eating machines. But because many species are cold blooded, some sharks eat only about 2 percent of their body weight each day. (That's a lot less than humans typically eat.) There is no record of a shark eating a person whole.

70-100 ATTACKS

5 FATALITIES

## FACING EXTINCTION...

While sharks kill fewer than 15 people a year, their own numbers suffer greatly at human hands. Between 20 and 100 million sharks die each year due to fishing activity, according to data from the Florida Museum of Natural History's International Shark Attack File. The organization estimates that many shark populations have plummeted 30 to 50 percent.

## THE BIGGER PICTURE: ECOLOGICAL IMPACT...

Sharks take anything from 7 to over 20 years to reach maturity, meaning that it takes populations a long time to recover; the current demand for their fins makes it impossible for their populations to fully return to previous levels. Sharks are top predators - when they are removed from the oceans, the entire eco-system suffers.

Tranimacies Eliza Steinbock,Marianna Szczygielska,Anthony Clair Wagner,2021-05-24 Tranimacies is a neologism that pushes and pulls together transness and animality so as to better germinate unruly wily perverse relationships between them and their spawn Through tranimacies the book aims at rethinking the linking of liberation struggles amongst former colonized peoples and lands minoritized genders and sexualities racially marked persons and non human animals and does so in a variety of geopolitical and temporal sites This rich compendium includes original scholarship and dialogues as well as poetry comix bioart and performance documentation The composite term of tranimacies enmeshes several everyday and scholarly concepts transgender animal animacy intimacies This edited volume s bundle of theoretical and artistic works insists on the beating heart of embodied experiences and political pulses at the core of these concepts The authors show that tranimacies are spread throughout what Mel Y Chen describes as the animacy hierarchies that delimit zones of possibility and agency confounding the vertical order with transversal movements As an intervention into the burgeoning debates within and across trans animal critical race and posthuman studies this publication seeks to destabilize the logic of turns in critical theory and through sticky intimacies

uncover how animality race and gender underscore the humanist production of meanings By taking a decolonial approach in the main but not exclusively the authors hope to shift debates in animal studies towards accounting for and delinking from colonial mentalities Three poems interweave our selection of chapters which together forge three lines of inquiry defined by a certain ethos transhistories of the present lessons from the bestiary and animatingephemera The chapters in this book were originally published as a special issue of *Angelaki*

**Respiration and metabolism of embryonic vertebrates** Roger S.
