

Applications

The VAV1717 and VAV1732 controllers are designed for Variable Air Volume (VAV) applications. These controllers operate on an RS-485 BACnet® MS/TP bus as BACnet Application Specific Controllers (B-ASCs).

These controllers feature 10 preloaded standard applications that operate standard VAV box equipment with a proven energy-efficient sequence of operation, without the need for programming. For information on configuring a controller to use a preloaded application, see [Setting a preloaded application](#). These controllers are also fully programmable using the Controller Configuration Tool (CCT), which provides the flexibility to create custom control sequences.

These controllers feature a combination of an integral digital differential pressure transducer (DPT), a damper actuator, and a 32-bit microprocessor. The small package size of the controllers facilitates quick field installation and efficient use of space without compromising high-tech control performance. The controllers connect easily to sensors for zone air temperature sensing.

Communications protocols

The VAV1717 and VAV1732 controllers can communicate using BACnet MS/TP, N2, or wireless Zigbee®. The default communications protocol for all new controllers is BACnet MS/TP. The BACnet protocol is a standard for ANSI, ASHRAE, and the International Standards Organization (ISO) for building controls.

You can use the VAV1717 and VAV1732 controllers as functional replacements for the following controllers:

- VMA1617 and VMA1632
- PCV1617 and PCV1632
- Legacy N2 controllers

These N2-capable MS/TP equipment controller models provide a cost-effective upgrade and modernization path for customers with existing N2 controllers. For installation and commissioning support, and tips for efficient and safe replacement, refer to the *Modernization Guide for Legacy N2 Controllers (LIT-12012005)* and the controller-specific documentation. For information about mapping

N2 objects in controllers with switchable communications protocols, refer to the *N2 Compatibility Options* chapter of the *Controller Tool Help (LIT-12011147)*.

To configure VAV1717 and VAV1732 controllers to communicate using the N2 communications protocol, see [Configuring N2 communications](#).
