Recent Advancements in Education Finance and Policy

Thomas Downes, Kieran M. Killeen, 2022-10-01 The past decade has seen a steady flow of important and innovative papers documenting the short and long term effects of finance reforms and the heterogeneity of the effects of reforms exemplified by papers like Jackson Johnson Persico 2016 LaFortune Rothstein Schanzenbach 2018 Hyman 2017 and Candelaria and Shores 2019 Those papers have reinvigorated research on the effects of finance reforms while raising important questions about how to best design a finance system and generate necessary revenues The papers mentioned above along with other papers too numerous to mention have taken advantage of better data and better methods to address long standing questions and generate provocative new answers Since the landscape has changed quickly policy makers and prospective researchers require a summary of the current state of the research on the effects of school finance reforms Answers are also needed to such questions as To what extent are lessons from the Great Recession applicable to the Covid 19 induced crisis For example how will states allocate cuts in grants and will those cuts undo state progress in equalizing educational access Are there strategies for allocating resources that best preserve student learning How do financing systems need to be modified to accommodate greater use of online education How should school finance systems be designed to provide equal access or at a minimum adequate access to students with special needs Why is there significant heterogeneity in the results of different finance reforms What have been the effects of recent state efforts to reduce the role of the property tax in financing K 12 education How should finance systems be designed to more effectively close persistent achievement gaps How if at all should states integrate the financing of preschool education with the financing of elementary and secondary education To help prepare the next generation of researchers and policy makers in the realm of school finance this volume includes papers that summarize the current state of research on the questions above as well as other pressing questions in education finance and policy The book aims to bridge a space between comprehensive textbooks and journal articles in the field of education finance and policy There are two main target audiences The book is meant to serve professionals like school district administrators and education policy practitioners that desire a contemporary update to their previous study of education finance and policy issues These audiences often have limited access to peer reviewed journals and knowledge of pertinent government and related policy reports in the field The book is also meant to serve students and faculty from programs in public administration public policy community development and applied economics education administration educational leadership and policy studies that are studying content related to education policy the economics of education state and local public finance and taxation Some upper level undergraduate students may also benefit from this resource

Reinventing America's Schools David Osborne, 2017-09-05 From David Osborne the author of Reinventing Government a biting analysis of the failure of America's public schools and a comprehensive plan for revitalizing American education In Reinventing America's Schools David Osborne one of the world's foremost experts on public sector reform offers a comprehensive analysis of the charter school movements and presents a theory that will do for American schools what his New York Times bestseller Reinventing Government did for public governance in 1992 In 2005 when Hurricane Katrina devastated New Orleans the city got an unexpected opportunity to recreate their school system from scratch The state's Recovery School District RSD created to turn around failing schools gradually transformed all of its New Orleans schools into charter schools and the results are shaking the very foundations of American education Test scores school performance scores graduation and dropout rates ACT scores college going rates and independent studies all tell the same story the city's RSD schools have tripled their effectiveness in eight years Now other

cities are following suit with state governments reinventing failing schools in Newark Camden Memphis Denver Indianapolis Cleveland and Oakland In this book Osborne uses compelling stories from cities like New Orleans and lays out the history and possible future of public education Ultimately he uses his extensive research to argue that in today s world we should treat every public school like a charter school and grant them autonomy accountability diversity of school designs and parental choice *Digest of Education Statistics 2011* Thomas D. Handbook of Mathematical Learning Difficulties Annemarie Fritz,Vitor Geraldi Haase,Pekka Räsänen,2019-01-30 This comprehensive volume provides teachers researchers and education professionals with cutting edge knowledge developed in the last decades by the educational behavioural and neurosciences integrating cognitive developmental and socioeconomic approaches to deal with the problems children face in learning mathematics The neurocognitive mechanisms and the cognitive processes underlying acquisition of arithmetic abilities and their significance for education have been the subject of intense research in the last few decades but the most part of this research has been conducted in non applied settings and there s still a deep discrepancy between the level of scientific knowledge and its implementation into actual educational settings Now it s time to bring the results from the laboratory to the classroom Apart from bringing the theoretical discussions to educational settings the volume presents a wide range of methods for early detection of children with risks in mathematics learning and strategies to develop effective interventions based on innovative cognitive test instruments It also provides insights to translate research knowledge into public policies in order to address socioeconomic issues And it does so from an international perspective dedicating a whole section to the cultural diversity of mathematics learning difficulties in different parts of the world All of this makes the International Handbook of Mathematical Learning Difficulties an essential tool for those involved in the daily struggle to prepare the future generations to succeed in the global knowledge society

The Link ,1997 Thinking and Acting Systemically Alan Daly,Kara Finnigan,2016-05-19 This volume argues that districts are important as a lever for change given the limited success of school by school efforts Policies that focus on skill development recognize and support performance create opportunities for collaboration build leader capacity and create networks of knowledge sharing hold great potential for improving districts but it will require a paradigm shift in the way we view our public school system and those who work within it away from blame and toward complex systems change
