Joseph II Pro In Power:

Performing Power Maria Berlova, 2021-04-19 *Performing Power* explores 18th century fabrication of the royal image by focusing on the example of King Gustav III 1746-1792 one of Sweden's most acclaimed and controversial monarchs who conspicuously chose theater as the primary media for his image making and role construction. The text postulates that Gustav III was motivated by theater's ability to aid him in fulfilling Enlightenment's tenet of broadly educating the populace and inculcating it with royal ideology. That he was an amateur actor, stage director, and playwright were other engines driving his choice. The project challenges and expands the commonly accepted perception of Gustav III's contribution to Swedish theater which has generally been limited to founding its National Opera, developing its national drama, and forming its national dramatic repertoire. Maria Berlova presents Gustav III as a performing King who strategically used political events as a framework through which he could embody the image of the ideal or enlightened monarch as presented by Voltaire. Through this *Performing Power* explores the tight relationship and complex bond between theatrical arts and politics. This unique study will be of great interest to students and scholars in theater studies, 18th century culture, and politics.

The Birth of a Great Power System, 1740-1815 Hamish Scott, 2014-07-22 *The Birth of a Great Power System 1740-1815* examines a key development in modern European history: the origins and emergence of a competitive state system. H. M. Scott demonstrates how the well-known and dramatic events of these decades—the emergence of Russia and Prussia, the three partitions of Poland, the continuing retreat of the Ottoman Empire, the unprecedented territorial expansion of Revolutionary and Napoleonic France halted by the final defeat of Napoleon—were part of a wider process that created the modern great power system dominated by Europe's five leading states. Enhanced by maps and a chronology of principal events, this comprehensive and accessible textbook is fully up to date in its coverage of recent scholarship. Unlike many other treatments of this period, Scott extends his beyond the French Revolution of 1789 in order to demonstrate how events both before and after this great upheaval merged to produce the central political development in modern European history. This book addresses the crucial phase in the emergence of the modern international system which, with the subsequent addition of the USA, Japan, and Russia, has prevailed until the present day.

The Science of State Power in the Habsburg Monarchy, 1790-1880 Borbala Zsuzsanna Török, 2024-06-01 The formation of modern European states during the long 19th century was a complicated process challenged by the integration of widely different territories and populations. *The Science of State Power in the Habsburg Monarchy 1790-1880* builds on recent research to investigate the history of statistics as an overlooked part of the sciences of the state in Habsburg legal education as well as within the broader public sphere. By exploring the practices and social spaces of statistics, author Borbala Zsuzsanna Török uncovers its central role in imagining the composite Habsburg Monarchy as a modern and unified administrative space.

The Balance of Power 1715-1789 Arthur Hassall, 1925 *Projecting Imperial Power* Helen Watanabe-O'Kelly, 2021 The nineteenth century is notable for its newly proclaimed emperors from

Franz I of Austria and Napoleon I in 1804 through Agust n and Pedro the emperors of Mexico and Brazil in 1822 to Victoria empress of India in 1876 Monarchs such as Napoleon III Maximilian of Mexico and Wilhelm I projected an imperial aura with coronations courts medals costumes portraits monuments international exhibitions festivals architecture and town planning They relied on ancient history for legitimacy whilst partially espousing modernity Projecting Imperial Power is the first book to consider newly proclaimed emperors in six territories across three continents across the whole range of the nineteenth century The first emperors successors Pedro II of Brazil Franz Joseph of Austria and Wilhelm II of Germany expanded their panoply of power until Pedro was forced to abdicate in 1889 and World War I brought the Austrian and German empires to an end Britain invented an imperial myth for its Indian empire in the 20th century until George VI relinquished the title of emperor in 1947 The imperial cities of Berlin Paris Vienna and New Delhi bear witness to vanished empires Using a wide range of source Projecting Imperial Power explains the imperial ambition behind these imperial cities It discusses how the empires and their rulers are remembered today by examining how the imperial statues that were erected in huge numbers in the second part of the period are treated today and how this demonstrates the contested place of emperors in national cultural memory

Cultures of Power in Europe During the Long Eighteenth Century Hamish M. Scott, Brendan Simms, 2007-07-05 An analysis of the forces which shaped politics and culture in Germany France and Great Britain in the eighteenth century

The Edinburgh Review, Or Critical Journal ,1806

The Sinews of Habsburg Power William D. Godsey, 2018 The Sinews of Habsburg Power explores the domestic foundations of the immense growth of central European Habsburg power from the rise of a permanent standing army after the Thirty Years War to the end of the Napoleonic wars With a force that grew irregularly in size from around 25 000 soldiers to as many as half a million in the War of the Sixth Coalition the Habsburg monarchy participated in shifting international constellations of rivalry from western Europe to the Near East and in some two dozen partly overlapping armed conflicts Raising forces of such magnitude constituted a central task of Habsburg government one that ultimately required the cooperation of society and its elites The monarchy s composite territorial structures in the guise of the Lower Austrian Estates a leading representative body and privileged corps formed a vital if changing element underlying Habsburg international success and resilience With its capital at Vienna the archduchy below the river Enns the historic designation of Lower Austria was geographically politically and financially a key Habsburg possession Fiscal military exigency induced the Estates to take part in new and evolving arrangements of power that served the purposes of government in turn the Estates were able in previously little understood ways and within narrowing boundaries to preserve vital interests in a changing world The Estates survived because they were necessary not only thanks to their increasing financial potency but also because they offered a politically viable way of exacting ever larger quantities of money men and other resources from local society These circumstances would persist as ruling became more regularized formalized and homogenized and as the very understanding of the Estates as a social and

political phenomenon was evolving **Encyclopædia Americana** Francis Lieber, Edward Wigglesworth, Henry Vethake, 1851 **The Hanoverians** Jeremy Black, 2007-01-20 A detailed critique of the eighteenth century German family and their reign on the British throne includes coverage of such topics as the language barrier that impacted George I's controversial rule, George III's loss of the American colonies and bouts with mental instability, and George IV's scandalous marriage and attempted divorce **Outlines of Universal History** George Park Fisher, 1885 *Modern history* George Park Fisher, 1888 **Outlines of Universal History Designed as a Text-book and for Private Reading** George Park Fisher, 1888 *Classics in Anthropometric History* John Komlos, Timothy Cuff, 1998 **English reformation to the fall of Poland**, 1897 *Sixteenth, seventeenth and eighteenth centuries* Israel Smith Clare, 1893 [Library of Universal History](#), 1901 **The History of the Popes, from the Foundation of the See of Rome to A.D. 1758; with an Introd. and a Continuation to the Present Time** Archibald Bower, Samuel H. Cox, 2024-04-28 Reprint of the original first published in 1845 *The History of Europe in Bite-sized Chunks* Jacob F. Field, 2019-03-07 An accessible and succinct account of the story of Europe from its ancient foundations to the twenty-first century European Union **Forging a Multinational State** John Deak, 2015-09-23 The Habsburg Monarchy ruled over approximately one-third of Europe for almost 150 years. Previous books on the Habsburg Empire emphasize its slow decline in the face of the growth of neighboring nation-states. John Deak instead argues that the state was not in eternal decline but actively sought not only to adapt but also to modernize and build. Deak has spent years mastering the structure and practices of the Austrian public administration and has immersed himself in the minutiae of its codes, reforms, political maneuverings, and culture. He demonstrates how an early modern empire made up of disparate lands connected solely by the feudal ties of a ruling family was transformed into a relatively unitary, modern, semi-centralized bureaucratic continental empire. This process was only derailed by the state of emergency that accompanied the First World War. Consequently, Deak provides the reader with a new appreciation for the evolving architecture of one of Europe's Great Powers in the long nineteenth century.
