School, Society, and State Tracy L. Steffes, 2011-04-01 Democracy has to be born anew every generation and education is its midwife wrote John Dewey in his classic work The School and Society In School Society and State Tracy Steffes places that idea at the center of her exploration of the connections between public school reform in the early twentieth century and American political development from 1890 to 1940 American public schooling Steffes shows was not merely another reform project of the Progressive Era but a central one She addresses why Americans invested in public education and explains how an array of reformers subtly transformed schooling into a tool of social governance to address the consequences of industrialization and

urbanization By extending the reach of schools broadening their mandate and expanding their authority over the well being of children the state assumed a defining role in the education and in the lives of American families In *School Society and State* Steffes returns the state to the study of the history of education and brings the schools back into our discussion of state power during a pivotal moment in American political development **Readers' Guide to Periodical Literature** ,1920

chains Heckert, Jessica, Myers, Emily, Malapit, Hazel J., 2020-10-22 Freedom of movement is an important aspect of women's empowerment especially in the context of rural transformation as women attempt to transition from subsistence agriculture into more remunerative roles such as involvement in higher nodes of the agricultural value chain which often involves marketing activities and traveling away from the home. Nevertheless, there is no agreement on how to measure freedom of movement in large scale surveys. First, we develop a conceptual framework for studying gendered freedom of movement that considers individual and household characteristics along with the broader social environment. We then synthesize the existing literature on factors that affect freedom of movement. Next, we review approaches for measuring freedom of movement that have been used in previous surveys. In comparing existing survey based approaches to the conceptual framework and existing literature, we conclude that existing approaches are limited in several ways. Foremost, they primarily focus on family and household based barriers to freedom of movement and do not consider the barriers present in the broader social environment. Additionally, they lack consideration for how freedom of movement may affect women's economic participation. To address the need for survey based modules for studies that examine how freedom of movement is related to economic participation, we propose two new approaches. The first approach is an experience based module that asks about frequency of visiting specific places, whether they were ever prevented from going to each of these places, and various limiting factors. The second approach uses vignettes designed to understand the relative strength of different social norms limiting women's freedom of movement and the strength of sanctions that would be imposed for violating these norms. Data collected with these modules have the potential to better understand limitations on women's freedom of movement and their consequences.
