## June 2013 C1 Marking Scheme:

Philosophical Foundations of Fiduciary Law Andrew S. Gold, Paul B. Miller, 2014-08-14 Fiduciary law is a critically important body of law. Fiduciary duties ensure the integrity of a remarkable variety of relationships, institutions, and organizations. They apply to relationships of great personal significance, including in some jurisdictions the relationship between parents and children. They structure a wide variety of commercial relationships and they are essential to the regulation of relationships between professional service providers and their clients, including relationships between lawyer and client, doctor and patient, and investment manager and client. Fiduciary duties, perhaps uniquely in private law, challenge traditional ways of marking the boundaries between private and public law, inasmuch as they figure prominently in public governance. Indeed, there is even a storied tradition of thinking of the authority of the state in fiduciary terms. Notwithstanding its importance, fiduciary law has been woefully under-analysed by legal theorists. Filling this gap with a series of chapters by leading theorists, this book includes chapters on the nature of fiduciary relationships, the connection between fiduciary duties and morality, the content and significance of fiduciary loyalty, the economic significance of fiduciary law, the application of fiduciary principles to public law and international law, the import of fiduciary relationships to theories of authority, and various other fundamental topics in the field. In many cases, new and important questions are raised by the book's chapters. Indeed, this book not only offers a much-needed theoretical assessment of fiduciary topics, it defines the field, going forward, setting an agenda for future philosophical study of fiduciary law.

**Croatia at the Crossroads: A consideration of archaeological and historical connectivity** David Davison, Vincent Gaffney, Preston Miracle, 2017-01-26 Papers focus on Croatia's particular interconnectedness in terms of social and cultural relationships with the wider region as the starting point for exploring issues across a broad chronological range from human origins to modernity.

Pattern Recognition and Image Analysis Joao Miguel Sanches, Luisa Micó, Jaime Cardoso, 2013-05-23 This book constitutes the refereed proceedings of the 6th Iberian Conference on Pattern Recognition and Image Analysis (IbPRIA 2013) held in Funchal, Madeira, Portugal, in June 2013. The 105 papers (37 oral and 68 poster ones) presented were carefully reviewed and selected from 181 submissions. The papers are organized in topical sections on computer vision, pattern recognition, image and signal applications.

The Art of the Con Anthony M. Amore, 2015-07-14 Must reading for any true crime fan, a diverse, colorful crew of art gallery grifters and scammers. Highly recommended. Howie Carr, New York Times bestselling author. Art scams are today so numerous that the specter of a lawsuit arising from a mistaken attribution has scared a number of experts away from the business of authentication and forgery, and with good reason. Art scams are increasingly convincing and involve incredible sums of money. The cons perpetrated by unscrupulous art dealers and their accomplices are proportionately elaborate. Anthony M. Amore's *The Art of the Con* tells the stories of some of history's most notorious yet untold cons. They involve stolen art, hidden for decades, elaborate ruses that involve the Nazis and allegedly plundered art, the theft of a

conceptual prototype from a well known artist by his assistant to be used later to create copies the use of online and television auction sites to scam buyers out of millions and other confidence scams incredible not only for their boldness but more so because they actually worked Using interviews and newly released court documents The Art of the Con will also take the reader into the investigations that led to the capture of the con men who oftentimes return back to the world of crime For some it s an irresistible urge because their innocent dupes all share something in common they want to believe An engrossing read about brazen artful scams Kirkus Reviews A riveting fast moving account of shameless fraudsters who wreak havoc on the art world A must read Brian T Kelly former Assistant United States Attorney     Applied Cryptography and Network Security Mark Manulis,Ahmad-Reza Sadeghi,Steve Schneider,2016-06-09 This book constitutes the refereed proceedings of the 14th International Conference on Applied Cryptography and Network Security ACNS 2016 held in Guildford UK in June 2016 5 The 35 revised full papers included in this volume and presented together with 2 invited talks were carefully reviewed and selected from 183 submissions ACNS is an annual conference focusing on innovative research and current developments that advance the areas of applied cryptography cyber security and privacy     Recent Trends in Applied Artificial Intelligence Moonis Ali,Tibor Bosse,Koen V. Hindriks,Mark Hoogendoorn,Catholijn M. Jonker,Jan Treur,2013-05-20 This volume constitutes the thoroughly refereed conference proceedings of the 26th International Conference on Industrial Engineering and Other Applications of Applied Intelligence Systems IEA AIE 2013 held in Amsterdam The Netherlands in June 2013 The total of 71 papers selected for the proceedings were carefully reviewed and selected from 185 submissions The papers focus on the following topics auctions and negotiation cognitive modeling crowd behavior modeling distributed systems and networks evolutionary algorithms knowledge representation and reasoning pattern recognition planning problem solving robotics text mining advances in recommender systems business process intelligence decision support for safety related systems innovations in intelligent computation and applications intelligent image and signal processing and machine learning methods applied to manufacturing processes and production systems

**We Are an African People** Russell Rickford,2016-01-14 During the height of the Black Power movement of the late 1960s and 1970s dozens of Pan African nationalist private schools from preschools to post secondary ventures appeared in urban settings across the United States The small independent enterprises were often accused of teaching hate and were routinely harassed by authorities Yet these institutions served as critical mechanisms for transmitting black consciousness Founded by activist intellectuals and other radicalized veterans of the civil rights movement the schools strove not simply to bolster the academic skills and self esteem of inner city African American youth but also to decolonize minds and foster a vigorous and regenerative sense of African identity In *We Are An African People* historian Russell Rickford traces the intellectual lives of these autonomous black institutions established dedicated to pursuing the self determination that the integrationist civil rights movement had failed to provide Influenced by Third World theorists and anticolonial campaigns organizers of the schools saw formal education as a means of creating a vanguard of young activists devoted to the struggle for black political sovereignty throughout the world Most of the institutions were short lived and they offered only modest numbers of children a genuine alternative to substandard inner city public schools Yet their stories reveal much about Pan Africanism as a social and intellectual movement and as a key part of an indigenous black nationalism Rickford uses this largely forgotten movement to explore a particularly fertile period of political cultural and social revitalization that strove to revolutionize African American life and envision an alternate society Reframing the post civil rights era as a period of innovative organizing he depicts the prelude to the modern Afrocentric movement and contributes to the ongoing conversation about urban educational reform race and identity

Helyette Geman, Dilip Madan, Stanley R. Pliska, Ton Vorst, 2013-11-11 The Bachelier Society for Mathematical Finance held its first World Congress in Paris last year and coincided with the centenary of Louis Bachelier's thesis defence. In his thesis Bachelier introduces Brownian motion as a tool for the analysis of financial markets as well as the exact definition of options. The thesis is viewed by many as the key event that marked the emergence of mathematical finance as a scientific discipline. The prestigious list of plenary speakers in Paris included two Nobel laureates Paul Samuelson and Robert Merton and the mathematicians Henry McKean and S. R. S. Varadhan. Over 130 further selected talks were given in three parallel sessions.

Numerical Analysis and Its Applications Ivan Dimov, István Faragó, Lubin Vulkov, 2013-10-01 This book constitutes thoroughly revised selected papers of the 5th International Conference on Numerical Analysis and Its Applications NAA 2012 held in Lozenetz, Bulgaria, in June 2012. The 65 revised papers presented were carefully reviewed and selected from various submissions. The papers cover a broad area of topics of interest such as numerical approximation and computational geometry, numerical linear algebra and numerical solution of transcendental equations, numerical methods for differential equations, numerical stochastics, numerical modeling and high performance scientific computing.      **After Identity** Dan Danielsen, Karen Engle, 2013-10-11 Authored by the leading voices in critical legal studies, feminist legal theory, critical race theory and queer legal theory, *After Identity* explores the importance of sexual, national and other identities in people's lived experiences while simultaneously challenging the limits of legal strategies focused on traditional identity groups. These new ways of thinking about cultural identity have implications for strategies for legal reform as well as for progressive thinking generally about theory, culture and politics.      *Massively Parallel Processing Applications and Development* L. Dekker, W. Smit, J. C. Zuidervart, 2013-10-22 The contributions of a diverse selection of international hardware and software specialists are assimilated in this book's exploration of the development of massively parallel processing (MPP). The emphasis is placed on industrial applications and collaboration with users and suppliers from within the industrial community. Consolidates the scope of the publication. From a practical point of view, massively parallel data processing is a vital step to further innovation in all areas where large amounts of data must be processed in parallel or in a distributed manner, e.g. fluid dynamics, meteorology, seismics, molecular engineering, image processing, parallel database processing. MPP technology can make the speed of computation higher and substantially reduce the computational costs. However, to achieve these features, the MPP software has to be developed further to create user-friendly programming systems and to become transparent for present-day computer software. Application of novel electro-optic components and devices is continuing and will be a key for much more general and powerful architectures. Vanishing of communication hardware limitations will result in the elimination of programming bottlenecks in parallel data processing. Standardization of the functional characteristics of a programming model of massively parallel computers will become established. Then efficient programming environments can be developed.

The result will be a widespread use of massively parallel processing systems in many areas of application     *The New York Daily Tribune Index* ,1895     Los Angeles Times ,1974     *Advances in Computer Vision and Information Technology* ,2013-12-30 The latest trends in information technology represent a new intellectual paradigm for scientific exploration and the visualization of scientific phenomena This title covers the emerging technologies in the field Academics engineers industrialists scientists and researchers engaged in teaching and research and development of computer science and information technology will find the book useful for their academic and research work
