Self-Fulfilling Prophecy Robert T. Tauber, 1997-02-25 What we expect all too often is exactly what we get Nowhere is this more true than in education where teachers expectations of students are crucial The self fulfilling prophecy should be of great interest to teachers both those in training and those in service Whether or not a teacher is aware of it the self fulfilling prophecy is at work impacting students either to their benefit or their detriment It follows that teachers should be made aware of the SFP and how it can be used effectively in education Using the new on line research facilities Dr Tauber has compiled over 700 doctoral dissertations and countless journal articles on stereotyping perception of social differences race gender ethnicity body features age socioeconomic levels special needs and other personal and situational factors The last part of the book presents a collection of testimonials written from the viewpoint of practitioners When the School Says No...How to Get the Yes! months old to his first ventures atop his father's surfboard as a toddler it was obvious that Marzo's single minded focus on all things surfing was unique But not until late in his teens when this surfing phenom was diagnosed with Asperger's syndrome did the deeper reasons for his obsession and his astonishing gift for surfing become clear Just Add Water is the remarkable story of Marzo's rise to the top of the pro surfing world and the personal trials he overcame in making it there Marzo endured a difficult childhood He was a colicky baby who his mother found could be soothed only with water Later as he entered school his undiagnosed Asperger's made it tough for him to relate to his peers and fit in but his relationship with the wave was elemental Marzo could always turn to surfing the only place where he truly felt at peace Unflinching and inspiring Just Add Water is a brave memoir from a one of a kind surfing savant who has electrified fans around the world with his gift and whose story speaks boldly to the hope and ultimate triumph of the human spirit *Education and Society* Kevin James Dougherty, Floyd M. Lawrence,2014-08-18 Correct instructional level and self esteem have never been fully addressed in public education
Principals and teachers who read the guidelines in this book and combine these simple requirements without additional
monies can make American public education number one worldwide in literacy Literacy for All Children Carolyn M.
Lawrence,2004 Drawing upon thirty two years of experience in public education ranging from the classroom to the principal
s office author Carolyn Lawrence offers advice insight and inspiration to her readers about how to make reading accessible
and even fun for students However Lawrence s point stretches far beyond literacy and delves into the idea that all students
regardless of background and correct instructional level are capable of learning and benefiting from a positive school
environment Her intention is to make the reader a participant in the school s life to give an insider s view of how much soul it
takes to make a school successful Through anecdotes and personal experience Lawrence provides all readers both educators
and others with a deeper understanding of the challenges of public education She demonstrates the role of the teacher and
the principal as the instructional leader and a daily participant in classroom life juggling a variety of roles and
responsibilities This book is useful to all readers with a concern for education and particularly for practicing and training
school administration and others concerned with curriculum and instruction planning It will also be helpful in preparing
teacher education students and new teachers for the classroom Early Childhood Education Petr G. Grotewell,Yanus R.
Burton,2008 This book focuses on early childhood education which spans the human life from birth to age 8 Infants and
toddlers experience life more holistically than any other age group Social emotional cognitive language and physical lessons
are not learned separately by very young children Adults who are most helpful to young children interact in ways that
understand that the child is learning from the whole experience not just that part of the experience to which the adult gives
attention Although early childhood education does not have to occur in the absence of the parent or primary caregiver this
term is sometimes used to denote education by someone other than these the parent or primary caregiver Both research in
the field and early childhood educators view the parents as an integral part of the early childhood education process Early
childhood education takes many forms depending on the theoretical and educational beliefs of the educator or parent Other
terms that is often used interchangeably with early childhood education are early childhood learning early care and early
education Much of the first two years of life are spent in the creation of a child s first sense of self or the building of a first
identity Because this is a crucial part of children s makeup how they first see themselves how they think they should function
how they expect others to function in relation to them early care must ensure that in addition to carefully selected and
trained caregivers links with family home culture and home language are a central part of program policy If care becomes a
substitute for rather than a support of family children may develop a less than positive sense of who they are and where they

come from because of their child care experience
