*Consumerism and Prestige* Anthony Enns, Bernhard Metz, 2022-07-05 This anthology explores the relationships and interdependencies between literary production and distinctions of taste by examining how the material aspects of literary texts such as the cover binding typography and paper stock reflect or even determine their cultural status In many cases for example the distinctions between highbrow and lowbrow taste have little to do with the content of the texts themselves as books often function as markers of socioeconomic status like clothing or home decor One might even go so far as to say that the concept of literary taste is more closely related to fashion sense than critical judgment The anthology seeks to address this claim by examining how the tensions between consumerism and prestige reflect fundamental historical changes with regard to the development of technology literacy and social power

*Liquid Scripture* Jeffrey S. Siker, 2017-09-01 The electronic Bible is here to stay packaged in software on personal computers available as apps on tablets and cell phones Increasingly students look at glowing screens to consult the Bible in class and congregants do the same in Bible study and worship Jeffrey S Siker asks what difference does it make to our experience of Scripture if we no longer hold a book in our hands if we again scroll through Scripture How does the flow of electronic Scripture change our perception of the Bible s authority and significance Siker discusses the difference made when early Christians adopted the codex rather than the scroll and Gutenberg began the mass production of printed Bibles He also reviews the latest research on how the reading brain processes digital texts and how churches use digital Bibles including American Bible Society research and his own surveys of church leaders Siker asks does the proliferation of electronic translations reduce the perceived seriousness of Scripture Does it promote an individualistic response to the Bible How does the change from a physical Bible affect liturgical practice His synthesis of the advantages and risks of the digitized Bible merit serious reflection in classrooms and churches alike

**As If By Chance** Kevin Reed Donley, 2023-12-21 The age of print was begun by Johannes Gutenberg in 1440 in Mainz Germany His invention of the mechanized and mass production of print replaced the previous handwriting of the scribes and was a transformative achievement It was both the product of and a catalyst for far reaching intellectual social and political changes that began during the Renaissance and continued for centuries right up to the present The age of electronic media was begun by Steve Jobs in 1985 in Cupertino California His integration of the elements of desktop publishing personal computer page layout software page description language and laser printer replaced the previous photomechanical processes of printing and was a transformative achievement It was both the product of and a catalyst for the intellectual social and political changes during the digital revolution that will extend for generations into the future This book discusses these two bookends in the age of print It follows the transitions and stages of innovation in printing between the fifteenth and twenty first centuries and shows how the inventors responsible for this progress are bound together in a chain of revolutionary technical change called disruptive continuity While the works of Gutenberg and Jobs are separated by more than five centuries there are striking parallels and differences between these two innovations They both sparked the quantitative expansion of literacy and the spread of knowledge around the world However the emergence of electronic publishing especially in its present day social media forms has brought a vast increase in the

consumption of information while also heralding a qualitative transformation that places the tools of wireless and mobile multimedia publishing into the hands of billions of people on earth Much in the same way that there was a historical lag between Gutenberg's invention and the full impact of printing on the world so too in our own time the long term societal consequences of electronic publishing have yet to be realized
