Kingspan Solar Installation Manual:

Design for Micro-Combined Cooling, Heating and Power Systems Nicolae Badea, 2014-09-25 This book provides a manual for the technical and structural design of systems for supplying decentralised energy in residential buildings. It presents the micro combined cooling heating the components that constitute these systems and advanced algorithms for achieving the structural and technical design of such systems. In residential buildings satisfying demands of durable development has gradually evolved from necessity to obligation and institutionalisation. Consequently a major paradigm change has appeared in the supply of energy to residential buildings from the centralised production of energy using fossil fuels to the decentralised production of energy using local renewable sources.
