insights into revolt as integral to medieval political life Drawing upon research from the social sciences and literary theory the essays use revolts and their sources to explore questions of meaning and communication identity and mobilization the use of violence and the construction of power The authors emphasize historical actors agency but argue that access to these actors and their actions is mediated and often obscured by the texts that report them Supported by an introduction and conclusion which survey the previous historiography of medieval revolt and envisage future directions in the field The Routledge History Handbook of Medieval Revolt will be an essential reference for students and scholars of medieval political history

*The Medieval Town* Fritz Rörig, 1967 *Rural and Urban Aspects of Early Medieval Northwest Europe* Adriaan Verhulst, 2024-10-28 The articles here concern the period from the end of the Roman Empire up to the 10th 11th centuries and the lands between the Loire and the Rhine most particularly the Low Countries Rural history forms the subject of the first studies which focus on the large classical estates of the Carolingian period Adriaan Verhulst has argued convincingly that these were medieval creations not any inheritance from Late Antiquity and emphasizes their regional differences The following section on urban history consists of three studies on the origins and early development of the key Flemish cities of Ghent Bruges and Antwerp this last now in English and three broader ranging essays which seriously challenge Pirenne's long accepted views of town origins In these the author makes full use of contemporary archaeological research to supplement the scanty written sources and to examine the possibilities of discontinuity from Roman times through the early Middle Ages Cette série d'articles concerne la période allant de la fin de l'Empire romain jusqu'aux 10<sup>e</sup> et 11<sup>e</sup> siècles et les territoires situés entre la Loire et le Rhin avec un attachement plus particulier aux pays bas Les premières études qui se concentrent sur les grands domaines classiques de l'époque carolingienne ont pour sujet l'histoire rurale Adriaan Verhulst a soutenu de façon convaincante qu'il s'agissait de créations médiévales plutôt que d'un héritage provenu de l'Antiquité tardive et il en souligne les différences régionales La section suivante qui traite de l'histoire urbaine consiste en trois études sur les origines et le développement des cités flamandes de Gand Bruges et Anvers et en trois essais moins spécifiques qui remettent sérieusement en question les opinions de Pirenne acceptées de longue date sur les origines de la ville Au travers de ces dernières l'auteur se sert pleinement de la recherche archéologique

Houtte, 2025-01-20      **The Invisible Hand?** Bas van Bavel, 2019-04-29 The Invisible Hand offers a radical departure from the conventional wisdom of economists and economic historians by showing that factor markets and the economies dominated by them the market economies are not modern but have existed at various times in the past They rise stagnate and decline and consist of very different combinations of institutions embedded in very different societies These market economies create flexibility and high mobility in the exchange of land labour and capital and initially they generate economic growth although they also build on existing social structures as well as existing exchange and allocation systems The dynamism that results from the rise of factor markets leads to the rise of new market elites who accumulate land and capital and use wage labour extensively to make their wealth profitable In the long term this creates social polarization and a decline of average welfare As these new elites gradually translate their economic wealth into political leverage it also creates institutional sclerosis and finally makes these markets stagnate or decline again This process is analysed across the three major pre industrial examples of successful market economies in western Eurasia Iraq in the early Middle Ages Italy in the

high Middle Ages and the Low Countries in the late Middle Ages and the early modern period and then parallels drawn to England and the United States in the modern period These areas successively saw a rapid rise of factor markets and the associated dynamism followed by stagnation which enables an in depth investigation of the causes and results of this process
