Educating Science Teachers for Sustainability Susan K. Stratton, Rita Hagevik, Allan Feldman, Mark Bloom, 2015-06-18 This volume contains a unique compilation of research and reflections representing multiple vantage points stemming from different parts of the world that can help science educators and teacher educators in finding ways to meaningfully and purposefully embed sustainability into teaching and learning It is a rich resource for exploring and contextualizing sustainability oriented science education At this time we find ourselves in a situation in which the earth's ecological system is under significant strain as a result of human activity In the developed world people are asking How can we maintain our current standard of living while those in the developing world are asking How can we increase the quality of our lives all while trying to do what is necessary to mitigate the environmental problems This volume responds to these questions with a focus on educating for sustainability including historical and philosophical analyses and pedagogical and practical applications in the context of science teacher preparation Included are many examples of ways to educate science teachers for sustainability from authors across the globe This text argues that issues of sustainability are increasingly important to our natural world built world national and international economics and of course the political world The ideas presented in the book provide examples for original effective and necessary changes for envisioning educating science teachers for sustainability that will inform policy makers

Dynamics of Sensorimotor Interactions in Embodied Cognition Guillaume T. Vallet, Benoit Riou, Lionel Brunel, Nicolas Vermeulen, 2016-04-15 We interact with our environment through perception and action Perception is based on sensory components while actions are based on motor components It is commonly accepted that these sensorimotor components constitute the foundation of knowledge i.e. percepts and concepts action and emotion However whether or not these components remain part of knowledge action and emotion is still being debated see Glenberg Witt Corveleyn Lopez Moliner Vermeulen et al 2013 Despite the accumulation of empirical evidence showing that perception memory action and emotion interact together less is known about the dynamics

of these interactions It remains to precise the temporal dynamic when these interactions occur the neural underlying networks and the factors that modulate these interactions The present research topic focuses on the dynamic relationship between present and absent sensorimotor components across perception memory action and emotion in a grounded cognition perspective This research topic aims 1 to demonstrate the validity of the embodied cognition theories 2 to highlight the dynamics of emergence of conceptual knowledge action and emotion 3 to provide a comprehensive state of the art theoretical explanation and or models
