A MatLab® Companion to Complex Variables A. David Wunsch, 2016-04-27 This book is intended for someone learning functions of a complex variable and who enjoys using MATLAB. It will enhance the experience of learning complex variable theory and will strengthen the knowledge of someone already trained in this branch of advanced calculus. ABET the accrediting board for engineering programs makes it clear that engineering graduates must be skilled in the art of programming in a language such as MATLAB. Supplying students with a bridge between the functions of complex variable theory and MATLAB this supplemental text enables instructors to easily add a MATLAB component to their complex variables courses. A MATLAB Companion to Complex Variables provides readers with a clear understanding of the utility of MATLAB in complex variable calculus. An ideal adjunct to standard texts on the functions of complex variables the book allows professors to quickly find and assign MATLAB programming problems that will strengthen students knowledge of the language and concepts of complex variable theory. The book shows students how MATLAB can be a powerful learning aid in such staples of complex variable theory as conformal mapping infinite series contour integration and Laplace and Fourier transforms. In addition to MATLAB programming problems the text includes many examples in each chapter along with MATLAB code. Fractals the most recent interesting topic involving complex variables demands to be treated with a language such as MATLAB. This book concludes with a Coda which is devoted entirely to this visually intriguing subject. MATLAB is not without constraints limitations irritations and quirks and there are subtleties involved in performing the calculus of complex variable theory with this language. Without knowledge of these subtleties engineers or scientists attempting to use MATLAB for solutions of practical problems in complex variable theory suffer the risk of making major mistakes. This book serves as an early warning system about these pitfalls.

NUMERICAL, SYMBOLIC AND STATISTICAL COMPUTING FOR CHEMICAL ENGINEERS USING MATLAB Ghosh, Pallab, 2018-09-01 Numerical analytical and statistical computations are routine affairs for chemical engineers. They usually prefer a single software to solve their computational problems and at present MATLAB has emerged as a powerful computational language which is preferably used for this purpose due to its built in functions and toolboxes. Considering the needs and convenience of the students the author has made an attempt to write this book which explains the various concepts of MATLAB in a systematic way and makes its readers proficient in using MATLAB for computing. It mainly focuses on the applications of MATLAB rather than its use in programming basic numerical algorithms. Commencing with the introduction to MATLAB the text covers vector and matrix computations, solution of linear and non linear equations, differentiation and integration and solution of ordinary and partial differential equations. Next analytical computations using the Symbolic Math Toolbox and statistical computations using the Statistics and Machine Learning Toolbox are explained. Finally the book describes various curve fitting techniques using the Curve Fitting Toolbox. Inclusion of all these advanced level topics in the book stands it out from the rest.

KEY FEATURES Numerous worked out examples to enable the readers understand the steps involved in solving the chemical engineering problems. MATLAB codes to explain the computational techniques. Several snapshots to help the readers understand the step by step procedures of using the toolboxes. Chapter end exercises including short answer questions and numerical problems. Appendix comprising the definitions of some important and special matrices. Supplemented with Solutions Manual containing complete detailed solutions to the unsolved analytical problems. Accessibility of selected colour figures including screenshots and results outputs of the programs cited in the text at www.phindia.com. Pallab_Ghosh
