Advances in Colonoscopy, An Issue of Gastrointestinal Endoscopy Clinics Douglas K. Rex, 2015-06-03 Colonoscopy is the bread and butter for endoscopists and advances in the procedure to reduce time improve efficiency and prevent errors are very important for this group The newest advances look at colonoscopy efficiency and a better way to target tissue sampling which avoids random biopsies and instead looks at ways to predict areas for sampling The Guest Editors have selected top experts to provide these important updates and they also address current thinking that questions the continued value of colonoscopies as predictors of colon cancer The issue will be a very popular one and it needs to be heavily promoted

Clinical Pancreatology for Practising Gastroenterologists and Surgeons Juan Enrique Dominguez-Munoz, 2021-03-17 Clinical Pancreatology Since the book Clinical Pancreatology for Practising Gastroenterologists and Surgeons was first published sixteen years ago the knowledge and clinical management of pancreatic diseases have developed markedly Thanks to the development of the translational research and the from bench to bedside concept much progress from the lab has been applied to clinical practice In addition several highly relevant clinical trials published over the last years have resulted in the update and optimisation of clinical guidelines A new and validated

classification of severity and complications of acute pancreatitis is firmly rooted in clinical practice and has been the basis for the development of minimally invasive approaches to pancreatic necrosis. The etiopathogenic knowledge of chronic pancreatitis and other pancreatopathies like that associated with diabetes mellitus has developed significantly. Especially important has been the development of the field of cystic pancreatic tumours which has been reflected in the publication of several guidelines and consensus reports over the last few years. Most research efforts have focused on pancreatic cancer which have led and will further lead to a significant increase in the therapeutic armamentarium against this devastating disease. Finally many newly published studies have changed the concept, causes, clinical relevance, diagnosis and treatment of exocrine pancreatic insufficiency. This new edition of *Clinical Pancreatology for Practising Gastroenterologists and Surgeons* has enjoyed the collaboration of the world's leading experts in each of the areas of clinical pancreatology with the aim of facilitating gastroenterologists, surgeons, oncologists, internists, nutritionists, diabetologists, paediatricians, radiologists, pathologists and other specialists in their decision making when facing patients with pancreatic diseases in their daily clinical practice. All in all this book supplies an indispensable update of the relevant aspects of clinical pancreatology.

Endoscopy Somchai Amornyotin, 2015-09-24. Endoscopy is a fast moving field and new techniques are continuously emerging. In recent decades endoscopy has evolved and branched out from a diagnostic modality to enhanced video and computer assisting imaging with impressive interventional capabilities. The modern endoscopy has seen advances not only in types of endoscopes available but also in types of interventions amenable to the endoscopic approach. To date there are a lot more developments that are being trialed. Modern endoscopic equipment provides physicians with the benefit of many technical advances. Endoscopy is an effective and safe procedure even in special populations including pediatric patients and renal transplant patients. It serves as the tool for diagnosis and therapeutic interventions of many organs including gastrointestinal tract, head and neck, urinary tract and others.
