Online Teaching at Its Best Linda B. Nilson, Ludwika A. Goodson, 2017-11-08 Bring pedagogy and cognitive science to online learning environments. *Online Teaching at Its Best: A Merger of Instructional Design with Teaching and Learning Research* is the scholarly resource for online learning that faculty, instructional designers and administrators have long been awaiting. Over 70 percent of degree-granting institutions offer online classes, and while technical resources abound, the courses often fall short of integrating the best practices in online pedagogy, even if they comply with online course design standards. Typically, these standards omit the best practices in teaching and learning and the principles from cognitive science, leaving students struggling to keep the pace, understand the material and fulfill their true potential as learners. This book fills the gap, providing evidence-based practices for online teaching, online course design and online student motivation, integrated with pedagogical and cognitive science to help you build the distance learning courses and programs your students deserve. As more and more students opt for distance learning, it's up to designers and instructors to rethink traditional methods and learn to work more effectively within the online learning environment and up to administrators to provide the needed leadership. *Online Teaching at Its Best* provides practical, real-world advice grounded in educational science to help online instructors, instructional designers and administrators deliver an exceptional learning experience. Adopt new pedagogical techniques designed specifically for online learning environments. Ensure strong course alignment and effective student learning for online classes. Increase student retention, build necessary support structures and train faculty more effectively. Integrate research-based course design and cognitive psychology into graduate or undergraduate programs. Distance is no barrier to a great education. What do stand in

the way are inadequate online course design and implementation and deficient faculty training and support all of which administrators can mitigate Online Teaching at Its Best will help you ensure that your online classes measure up to the rigor and quality of excellence in teaching and assessment build in the personal touch for developing a learning community and equip your students to succeed in the next challenge Critical Thinking, Clinical Reasoning, and Clinical Judgment E-Book Rosalinda Alfaro-Lefevre, 2019-07-23 Develop the critical thinking and reasoning skills you need to make sound clinical judgments Alfaro LeFevre's Critical Thinking Clinical Reasoning and Clinical Judgment A Practical Approach 7th Edition brings these concepts to life through engaging text diverse learning activities and real life examples Easy to understand language and a how to approach equip you to become a sensible resilient critical thinker with the clinical reasoning skills you need to think think through complex issues and make sound clinical decisions This edition emphasizes readiness for clinical practice and the Next Generation NCLEX exam with a focus on systems thinking interprofessional practice nursing skills for the 21st century and Quality and Safety for Nursing Education QSEN competencies Clear straightforward approach and motivational writing style provides vivid examples memorable anecdotes and real life case scenarios to make content come alive Focus on application how to with supporting rationales theory makes difficult concepts easy to learn Critical Thinking Indicators feature evidence based descriptions of behaviors that foster critical thinking in nursing practice Highlighted features and sections that promote deep learning include This Chapter at a Glance Learning Outcomes Key Concepts Guiding Principle boxes Critical Moments boxes Other Perspectives features Think Pair Share activities H M O Help Me Out cartoons real life clinical scenarios Key Points Critical Thinking Exercises and more Cultural spiritual and lifespan content explores the nurse's role in hospitals long term care settings and entire communities presenting a broad approach to critical thinking Inclusion of ethics and standards based professional practice reflects the increased demand for accountability in today's professional climate Timely coverage of the latest in nursing education and critical thinking includes concept based learning QSEN and IOM standards problem focused versus outcome focused thinking prioritization and delegation developing a culture of safe healthy work environments expanding roles related to diagnosis and management improving grades and passing tests the first time NCLEX exam preparation ensuring that documentation reflects critical thinking communication and interpersonal skills strategies for common workplace challenges and more **The small BIG** Steve J. Martin, Noah Goldstein, Robert Cialdini, 2016-04-12 At some point today you will have to influence or persuade someone your boss a co worker a customer client spouse your kids or even your friends What is the smallest change you can make to your request proposal or situation that will lead to the biggest difference in the outcome In The small BIG three heavyweights from the world of persuasion science and practice Steve Martin Noah Goldstein and Robert Cialdini describe how in today's information overloaded and stimulation saturated world increasingly it is the small changes that you make that lead to the biggest differences In the last few years more and more research from fields such as neuroscience cognitive psychology

social psychology and behavioral economics has helped to uncover an even greater understanding of how influence persuasion and behavior change happens Increasingly we are learning that it is not information per se that leads people to make decisions but the context in which that information is presented Drawing from extensive research in the new science of persuasion the authors present lots of small changes over 50 in fact that can bring about momentous shifts in results It turns out that anyone can significantly increase his or her ability to influence and persuade others not by informing or educating people into change but instead by simply making small shifts in approach that link to deeply felt human motivations
