Schmadel, G. Zech, 2013-12-14 From the reviews: *Astronomy and Astrophysics Abstracts* has appeared in semi-annual volumes since 1969 and it has already become one of the fundamental publications in the fields of astronomy, astrophysics, and neighbouring sciences. It is the most important English language abstracting journal in the mentioned branches. The abstracts are classified under more than hundred subject categories, thus permitting a quick survey of the whole extended material. The AAA is a valuable and important publication for all students and scientists working in the fields of astronomy and related sciences. As such it represents a necessary ingredient of any astronomical library all over the world. *Space Science Reviews* 1 Dividing the whole field plus related subjects into 108 categories, each work is numbered and most are accompanied by brief abstracts. Fairly comprehensive cross-referencing links relevant papers to more than one category, and exhaustive author and subject indices are to be found at the back, making the catalogues easy to use. The series appears to be so complete in its coverage and always less than a year out of date that I

shall certainly have to make a little more space on those shelves for future volumes The Observatory Magazine 1
