Weaponisation of Space: An Inevitable Reality and Plausible Fallout Group Captain PA Patil, 2017-01-15 Militarily use of spacebased assets when integrated with operations assumes importance as one of the many force multipliers As on date outer space is being extensively used by the armed forces for varied services which include navigation intelligence surveillance reconnaissance environmental monitoring and advance warning The command and control in today's netcentric environment also depends on space resources Thus the use of outer space with spacebased assets in support of military operations leads to the deduction that space as a medium stands militarised Of late many of the dominant nations have developed or are expanding capabilities to attack the spacebased assets of potential adversaries to disrupt command and control structures Countries like the US and China are contesting for space supremacy and working towards developing spacebased weapons capable of being delivered from spacebased platforms These developments in turn are infusing a sense of insecurity amongst other international players including India and have raised concerns worldwide Development of spacebased weapons by any state has the potential to ignite a new arms race in space as many countries now possess the wherewithal for launching spacebased assets capable of carrying the required payloads Thus from the present capability of militarisation of space we seem to be graduating towards weaponisation of space As outer space has been designated as one of the global commons any sort of deployment or employment of space weapons raises concerns and any use of spacebased weapons will have unpleasant cascading effects In the absence of any international curb or law on space weaponisation it continues to be a conceptual possibility as well as an empirical reality

The Escape from Balance Sheet Recession and the QE Trap Richard C. Koo, 2014-10-01 Compare global experiences during the balance sheet recession and find out what is needed for a full recovery The Escape from Balance Sheet Recession and the QE Trap details the many hidden dangers remaining as the world slowly recovers from the balance sheet recession of 2008 Author and leading economist Richard Koo explains the unique political and economic pitfalls that stand in the way of recovery from this rare type of recession that was largely overlooked by economists Koo anticipated the current predicament in the West long before others and issued warnings in his previous books Balance Sheet Recession and The Holy Grail of Macroeconomics This new book illustrates how history is repeating itself in Europe while the United States which learnt from the Japanese experience is doing better by avoiding the fiscal cliff However because of the liberal dosage of quantitative easing already implemented the United States the United Kingdom and Japan may face a

treacherous path to normalcy in what Koo calls the QE Trap He argues that it is necessary to understand balance sheet recession in order to resolve the Eurozone crisis particularly the competitiveness problems Koo issues warnings against those who are too ready to argue for structural reforms when the problems are actually with balance sheets He re examines Japan s two decades of experiences with this rare recession and offers an insider view on the Abenomics On China readers will gain a very different historical perspective as Koo argues that western commentators have forgotten their own history when they talk about the re balancing of the Chinese economy Learn from Japan which experienced the same predicament afflicting the West fifteen years earlier Discover how unwinding of quantitative easing will affect the United States the United Kingdom Japan as well as the emerging world Examine solutions to the Eurozone problems caused by two balance sheet recessions eight years apart Gain insight into China s problems from the West s own experiences with urbanisation Koo who developed the concept of balance sheet recession based on Japan s experience took the revolution in macroeconomics started by John Maynard Keynes in 1936 to a new height The Escape from Balance Sheet Recession and the QE Trap offers the world cure for balance sheet recession
