Extinction and the Human Timothy Sweet,2021-10-08 The Americas have been the site of two distinct waves of human migration each associated with human caused extinctions The first occurred during the late Pleistocene era some ten to thirty thousand

years ago the other began during the time of European settler colonization and continues to this day In *Extinction* and the *Human* Timothy Sweet ponders the realities of animal extinction and endangerment and the often divergent Native American and Euro American narratives that surround them He focuses especially on the force of human impact on megafauna mammoths whales and the North American bison beginning with the moments that these species extinction or endangerment began to generate significant print archives transcriptions of traditional Indigenous oral narratives historical and scientific accounts and literary narratives by Indigenous American and Euro American authors If the Sixth Extinction is a hyperobject an event so massively distributed in space and time that it cannot be experienced directly he writes these cases of particular megafauna have nevertheless consistently commanded our focus and attention They form a starting point for a coherent approachable history Reflecting on questions of agency responsibility and moral assessment Sweet engages with the consequences of thinking of humans as fundamentally separate from the rest of the natural world He investigates stories of a lost race of giants at the time of the first encounters between Europeans and Indigenous Americans culturally distinct ways of understanding the extinction of the mammoths the impact of the Euro American whaling industry and the controversial revitalization of Native American whaling traditions and the bison s near extermination at the hands of white market hunters and today s Euro American and Native American efforts on behalf of the animal s preservation He reflects on humans relations with animals through models of divine preservation competitive extermination evolutionary determination biophilia and treaties with animals Ultimately he argues it is the critical assessment of ideas of human exceptionalism that provides a necessary counterpoint both to apologies for human mastery over nature and deep ecology s attempts to erase the human
