information seeking According to this exhilarating genre bending book what s left out of the conventional understanding of curiosity are the wandering tracks the weaving concepts the knitting of ideas and the thatching of knowledge systems the networks the relations between ideas and between people Curiosity say Perry Zurn and Dani Bassett is a practice of connection it connects ideas into networks of knowledge and it connects knowers themselves both to the knowledge they seek and to each other Zurn and Bassett identical twins who write that their book represents the thought of one mind and two bodies harness their respective expertise in the humanities and the sciences to get irrepressibly curious about curiosity Traipsing across literatures of antiquity and medieval science Victorian poetry and nature essays as well as work by writers from a variety of marginalized communities they trace a multitudinous curiosity They identify three styles of curiosity the busybody who collects stories creating loose knowledge networks the hunter who hunts down secrets or discoveries creating tight networks and the dancer who takes leaps of creative imagination creating loopy ones Investigating what happens in a curious brain they offer an accessible account of the network neuroscience of curiosity And they sketch out a new kind of curiosity centric and inclusive education that embraces everyone s curiosity The book performs the very curiosity that it describes inviting readers to participate to be curious with the book and not simply about it

Populism and Higher Education Curriculum Development: Problem Based Learning as a Mitigating Response Romeo V. Turcan, John E. Reilly, 2020-11-21 Against a background of increasing inequality and a rising tide of nationalism and populism this book raises concerns that curriculum is being shaped by powerful non academic non accountable forces and that populism and its manifestations represent a grave challenge to learning It explores the extent to which curriculum and learning methods in higher education should respond to this challenge Using problem based learning as a case study it draws on crossdisciplinary studies to examine how regional national and organizational perspectives emphasize different aspects of PBL It questions whether PBL provides an effective response to external influences and a populist higher education agenda In conclusion the book poses an uncomfortable question whether graduates reflect the external forces shaping curriculum and hence may be as vulnerable to populist rhetoric as non graduates precisely because the curriculum and learning methods do not engage with the challenges This book will appeal to scholars of problem based learning as well as populism and the role of higher education in society
