Federal Taxation 2014 Solution Manual:

Winning the Tax Wars Brigitte Alepin, Blanca Moreno-Dodson, Louise Otis, 2016-04-24 Over the past few decades the concentration of wealth and property in the hands of a few has been facilitated by tax evasion tax avoidance and above all by tax competition Fortunately a determined move toward international cooperation among tax authorities is gathering its forces to do battle This invaluable book shows how the globalization of trade the digitization of the economy tax competition between sovereign states the erosion of the tax base and the transfer of profits have all revealed the weaknesses of a traditional tax system that has reached its limits and how numerous states and groups of states have joined efforts in creating a new international tax system designed to restore fairness and stability in the levying of taxes worldwide Stemming from a 2016 conference initiated by the Canadian non profit organization TaxCOOP convened by the World Bank and bringing together well known taxation experts from prominent international organizations the book presents outstanding contributions highlighting the impacts of tax competition and viable solutions Among the issues and topics covered are the following electronic commerce and electronic money transfer pricing derivatives and hedge funds protecting tax whistle blowers offshore tax investigations possibility of an international tax court impact of tax competition on developing countries carbon pricing tobacco taxation and effective taxation of the ultra wealthy and their financial capital The chapters include details of country experiences and results in some cases analyzed by key protagonists themselves Collectively the contributions take a giant step toward reinforcing the power of sovereign states in sectors such as the environment education and health As an authoritative guide to increasing the level of transparency and accountability of private and public economic actors and restoring citizens trust in the fairness of our global governance systems this peerless volume will be warmly welcomed by tax lawyers taxation authorities and interested academics worldwide

Tax Justice and Global Inequality Krishen Mehta, Esther Shubert, Erika Dayle Siu, 2020-10-29 In the wake of the Panama Papers scandal and similar leaks tax havens are now firmly in the spotlight Today roughly half of all global trade still passes through tax haven jurisdictions costing millions in lost revenue to countries around the world Such practices affect all of us but are most keenly felt by poorer people in developing countries where unfair tax practices have become a major obstacle to development and which have allowed multinational corporations to continue to exploit developing economies This collection argues that for developing countries to achieve social justice and lasting prosperity they must take control of their own tax destinies and that this will also be crucial to achieving the Sustainable Development Goals Covering such topics as natural resource management representation in global tax institutions and effective strategies for building and protecting tax bases the collection brings together expertise from a variety of countries and disciplines It explores the options available to developing countries and provides a basis for concerted action by tax authorities policy makers academics and civil society experts to design tax systems that can sustain a just society

Virtues and Fallacies of VAT: An Evaluation after 50 Years Robert

F. van Brederode, 2021-08-09 Value added tax VAT is a mainstay of revenue systems in more than 160 countries. Because consumption is a more stable revenue base than other tax bases, VAT is less distorting and hence more likely to encourage investment, savings, optimum labor supply decisions, and growth. VAT is not without criticism, however, and faces its own specific technical and policy challenges. This book, the first to thoroughly evaluate VAT from a global policy perspective after over 50 years of experience with its intricacies, offers authoritative perspectives on VAT's full spectrum, from its signal successes to the subtle ways its application can undermine revenue performance and economic neutrality. The contributors, leading tax practitioners and academics, examine the key policy issues and topics that are crucially relevant for measuring the success of the tax in the first part of the book, including revenue generation and revenue efficiency, single rate versus multiple rates, susceptibility to fraud, exemptions and exceptions, compliance cost for businesses, policy and compliance gaps in revenue collection, adjustment rules caused by the transactional nature of the tax, transfer pricing issues, treatment of vouchers, permanent establishments, and holding companies, payment of refunds, cross-border digital transactions, and supplies for free or below cost price. The second part offers six country reports on New Zealand, Japan, China, Colombia, Ethiopia, and India to demonstrate the different ways in which VAT operates in a variety of national economies. Whether a government is contemplating the imposition of a general consumption tax for the first time or new rules for applying an existing one, it is important for policymakers to keep central the aim to design a tax that realizes optimal efficiency and causes minimal distortions. This invaluable book serves as an expert guide to VAT policy development in this area. It will be welcomed not only by concerned government officials but also by tax professionals, both lawyers and accountants, and academics in tax law.

Financing Infrastructure Richard M. Bird, Enid Slack, 2017-12-04 Politicians and citizens universally agree that Canada's urban infrastructure urgently needs work. Roads and bridges are overdue for repair, aging water systems should be replaced, sewage must be adequately treated, urban transit needs to be updated and extended, and it is necessary that public housing, as well as schools, health centres, and government offices, are brought up to current standards. But few cities have room to raise additional revenue, and the federal and provincial governments to which they turn for financial support are already in deficit, so who is going to pay for all of this? Bringing together perspectives and case studies from across Canada, the US, and Europe, *Financing Infrastructure* argues that the answer to the question "Who should pay?" should always be "users." Headed by two of Canada's foremost experts on municipal finance, this book provides a closer look at why charging user fees makes sense, how much users should pay, how to charge fees well, and where present processes can be improved, and how to convince the politicians and the public of the importance of pricing infrastructure correctly. Across the disciplines of public policy, urban studies, and economics, almost no one is looking at the extent to which users should play a role in infrastructure planning. *Financing Infrastructure* contends that the users, not federal and provincial taxpayers, should start paying directly for their cities' repairs and expansions. Contributors include Richard M. Bird, University of Toronto.
