The Crash of Federal Express Flight 1478 Hank Williamson, Editor, 2012-10-01 On July 26 2002 about 0537 eastern daylight time Federal Express flight 1478 a Boeing 727 232F on its way from Memphis International Airport to Tallahassee Regional airport struck trees on short final approach and crashed short of runway 9 at the Tallahassee Regional Airport Florida The flight was operating as a scheduled cargo flight from Memphis to Tallahassee The captain first officer and flight engineer were seriously injured and the airplane was destroyed by impact and resulting fire Night visual meteorological conditions prevailed for the flight which operated on an instrument flight rules flight plan The National Transportation Safety Board determines that the probable cause of the accident was the crew's failure to establish and maintain a proper glidepath during the night visual approach to landing Contributing to the accident was a combination of the captain's and first officer's fatigue the crew's failure to monitor the approach and the first officer's color vision deficiency

The Limits of Expertise R. Key Dismukes, Benjamin A. Berman, Loukia Loukopoulos, 2017-03-02 Why would highly skilled well trained pilots make errors that lead to accidents when they had safely completed many thousands of previous flights The majority of all aviation accidents are attributed primarily to human error but this is often misinterpreted as evidence of lack of skill vigilance or conscientiousness of the pilots The Limits of Expertise is a fresh look at the causes of pilot error and aviation accidents arguing that accidents can be understood only in the context of how the overall aviation system operates The authors analyzed in great depth the 19 major U S airline accidents from 1991 2000 in which the National Transportation Safety Board NTSB found crew error to be a causal factor Each accident is reviewed in a separate chapter that examines events and crew actions and explores the cognitive processes in play at each step The approach is guided by extensive evidence from cognitive psychology that human skill and error are opposite sides of the same coin The book examines the ways in which competing task demands ambiguity and organizational pressures interact with cognitive processes to make all experts vulnerable to characteristic forms of error The final chapter identifies themes cutting across the accidents discusses the role of chance criticizes simplistic concepts of causality of accidents and suggests ways to reduce vulnerability to these catastrophes The authors' complementary experience allowed a unique approach to the study accident investigation with the NTSB cognitive psychology research both in the lab and in the field enormous first hand experience of piloting and application of aviation psychology in both civil and military operations This combination allowed the authors to examine and explain the domain specific aspects of aviation operations and to extend advances in basic research in cognition to complex issues of human performance in the real world Although The Limits of Expertise is directed to aviation operations the implications are clear for understanding the decision processes skilled performance and errors of professionals in many domains including medicine

Aviation Information Management Barbara G. Kanki, 2017-03-02 Operational information management is at a crossroads as it sheds

the remaining vestiges of its paper based processes and moves through the uncharted domain of electronic data processes. The final outcome is not yet in full focus but real progress has been made in the transition to electronic documents providing the aviation industry with a clear direction. This book looks at a combination of industry initiatives and airline successes that point to the next steps that operators can take as they transition to fully integrated information management systems. Although the route has not been fully identified it is evident that a key to successful long term efficient information management is industry wide cooperation. The chapters are authored by a range of experts in operational information management and collectively they outline ways that operators can improve efficiency across flight ground and maintenance operations. Considerations and recommendations are identified and presented addressing the following priorities: Safety critical information and procedures, Human factors, Information security, Operational information standardization. The readership includes Airline flight operations managers and standards personnel, Airline operating documents and publication specialists, Airline information managers, Commercial pilots, Airline maintenance managers and personnel, Manufacturers and vendors of aviation products, Aviation regulators and policy makers, Aviation researchers and developers of information technologies and Military technical publications specialists.

Manuals Combined: Military Working Dog Handler Medical and Doctrine Presentations And Manuals , Over 3 200 total slides and pages. INTRODUCTION. Dogs have served in active service at the sides of their handlers for decades. They have been heroes showing bravery under fire, saving lives, often losing their own and bringing comfort to the injured and infirmed. The first recorded American use of military dogs was during the Seminole War of 1835 and again in 1842. In Florida and Louisiana the Army used Cuban bred bloodhounds for tracking. During the US Civil War dogs were used as messengers, guards and unit mascots. The Army Quartermaster Corps began the US Armed Forces first war dog training during World War II. By 1945 they had trained almost 10 000 war dogs for the Army, Navy, Marine Corps and Coast Guard. Fifteen war dog platoons served overseas in World War II. Seven platoons saw service in Europe and eight in the Pacific. MWDs were trained at Fort Carson, Colorado, organized into scout dog platoons and used in the Korean conflict for sentry duty and support of combat patrols. In 1957 MWD training moved to Lackland Air Force base, LAFB, Texas with the Air Force managing the program. Throughout the Vietnam Conflict the Military Police Corps used dogs with considerable success. Most of these were sentry dogs used to safeguard critical installations such as ports and airfields. A new dimension in canine utilization was realized when marijuana detector dog teams were trained and deployed to assist military police in suppressing illicit drug traffic. Sentry and marijuana detector dog teams were then deployed worldwide in support of military police. An important

outgrowth of the conflict was the development of canine research and development efforts These ongoing efforts were able to initiate the first steps toward developing a more intelligent and stronger military dog training dogs to detect specific drugs and explosives developing multiple purpose dogs and employing tactical dogs by electronic remote control In the 1990s and early 2000s MWDs were deployed around the globe in military operations such as Just Cause Desert Shield and Desert Storm Uphold Democracy and Enduring Freedom and Iraqi Freedom These teams were effectively utilized to enhance the security of critical facilities and areas as well as bolster force protection and antiterrorism missions allowing commanders to use military police
