1. The first step in the process of identifying a research problem is to determine the general area of interest. This is often done by reviewing the literature in the field and identifying gaps in knowledge. Once a general area has been identified, the next step is to narrow down the focus of the research. This is often done by identifying specific research questions or hypotheses. The final step in the process is to develop a research plan, which outlines the methods that will be used to collect and analyze data.
